

Slovenia

Release: June 2024

Data Source

- Release:** June 2024
- Data:** © Michael Bauer Research GmbH 2024 based on © Statistical Office of the Republic of Slovenia, Eurostat.
- Boundaries:** © Michael Bauer Research GmbH, Nuremberg, Germany, 2023. Data Source for Digital Boundaries: 2023 Michael Bauer Research GmbH based on © Surveying and Mapping Authority of the Republic of Slovenia, Register of Spatial Units, 2023. All sources modified and enhanced by Michael Bauer Research GmbH, utilization only with authorization.
- Settlement Points:** These settlement points were created using the 2022 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>. The data was verified using the latest Esri imagery and Michael Bauer Research 2021 population.

Dataset Information

Slovenia	
3 Letter ISO Country code	SVN
Currency	Euro
3 Letter Currency code	EUR
Number of attributes available	132
Number of geography levels	10

Geography Levels

Change Notes

Market Data are now projections for 2023 (before: 2022). Unemployed Persons are shown for 2022 (before 2021). The Purchasing Power projections for 2023 show an upward trend due to high inflation. Consumer Spending 2023 shows high deviations from last year's delivery due to high inflation in almost all European countries and significant volatility of the raw data of the official statistical offices in the aftermath of Covid-19 pandemic. Based on official statistics, the number of Unemployed Persons shows a significant decline due to an economic recovery after the Covid-19 pandemic.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Household Types are based on per household values of the respective Obcine. Education, Marital Status and Unemployed Persons are based on per capita values of respective Obcine. Household Types are based on per household values of the respective Obcine. Education, Marital Status and Unemployed Persons are based on per capita values of respective Obcine. For data privacy, population and household numbers are anonymized for all areas with less than 10 inhabitants. For these areas, all variables referring to currency and population related values are based on national average, all other variables are set to 0.
