

# Thailand

Release: November 2022

## Data source

Release: November 2022  
Data: © Michael Bauer Research GmbH 2022 based on © National Statistical Office, UN.  
Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2022. Data Source for Digital Boundaries: 2022 Michael Bauer Research GmbH based on. © GISTDA (Geo-Informatics and Space Technology Development Agency), Thailand. All sources modified and enhanced by Michael Bauer Research GmbH, utilization only with authorization.  
Settlement Points: Nostra 2021 Housing Units used to create 90m Hexagonal Mean Centroids verified with Esri imagery and 2020 Settlement Points

## Dataset Information

| Thailand                       |           |
|--------------------------------|-----------|
| 3 Letter ISO Country code      | THA       |
| Currency                       | Thai baht |
| 3 Letter Currency code         | THB       |
| Number of attributes available | 106       |
| Number of geography levels     | 3         |

## Geography Levels

| Geography Levels | Geography Levels Available for Thailand | Available through ArcGIS.com Maps | Feature Count |
|------------------|---|-----------------------------------|---------------|
| Country          | X                                       | X                                 | 1             |
| Provinces        | X                                       | X                                 | 77            |
| Districts        | X                                       | X                                 | 928           |

## Data Apportionment Settings

Learn about [data apportionment](#).

| Threshold Upper Bound | Aggregation Method   | Level of Geography |
|-----------------------|----------------------|--------------------|
| 150 km                | Block Apportion      | TH.Districts       |
| more                  | Centroids In Polygon | TH.Districts       |

# Thailand

Release: November 2022

## Change Summary

Changes to geography level names

None.

New Attributes

None.

Attributes no longer available

None.

## Change Notes

Market Data are now projections for 2022 (before: 2021). Consumer Spending 2022 shows deviations from 2020 with shifts within categories due to the different developments in the Covid-19 pandemic. Using new input data from the official statistics leads to deviations in Households, Age and Gender.

The settlement points have been updated from the Esri raster-based points to Nostra 2021 Housing Units used to create 90m Hexagonal Mean Centroids verified with Esri Imagery and 2020 Settlement Points. These settlement points are an improvement over the previous version and could result in significant changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

None.
