## Change Notes

Market Data are now projections for 2022 (before: 2021).

The settlement points have been updated from the Esri raster-based points to the Worldpop.org raster-based points. The Worldpop.org data uses newer input data than the Esri raster-based data, more information can be found on Worldpop.org. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes
