

Ukraine

Release: June 2023

Data Source

Release: June 2023
Data: © Michael Bauer Research GmbH 2023 based on © State Statistics Service of Ukraine, Eurostat.
Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2022.
Settlement Points: These settlement points were created using the 2022 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>. The data was verified using the latest Esri imagery and Michael Bauer Research 2021 population.

Dataset Information

Ukraine	
3 Letter ISO Country code	UKR
Currency	Ukrainian hryvnia
3 Letter Currency code	UAH
Number of attributes available	107
Number of geography levels	5

Geography Levels

Geography Levels	Geography Levels Available for Ukraine	Available through ArcGIS.com Maps	Feature Count
Country	X	X	1
Regions	X	X	27
Postcodes2	X		97
Postcodes5	X		28864
Districts	X	X	138

Threshold Upper Bound	Aggregation Method	Level of Geography
150 km	Block Apportion	UA.Districts
250 km	Centroids In Polygon	UA.Districts
more	Centroids In Polygon	UA.Postcodes5

Ukraine

Release: June 2023

Change Summary

Changes to geography level names

None.

New Attributes

None.

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). Consumer Spending in 2022 in Europe shows variations compared to 2021 with shifts within categories due to the lifting of restrictions under the Covid 19 pandemic. Using new input data from the official statistics leads to deviations in Unemployment data. Due to the ongoing war in Ukraine, the 2022 personal data is not shown as a mid-year forecast but as of Jan. 1, 2022. The currency-related data represents a revised version to the 2021 data status.

The settlement points have been updated from 2017 Esri raster-based points to the 2022 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Due to the regional distortions in the wake of the political situation in Crimea and the eastern part of the country since 2014, it is currently not possible to reliably determine regional market data for the Autonomous Republic of Crimea, Sevastopol, and the oblasts of Donets'ka and Luhans'ka. The regional market data for Ukraine are therefore currently shown without these areas. Due to the ongoing war in Ukraine, the 2022 personal data is not shown as a mid-year forecast but as of Jan. 1, 2022. The currency-related data represents a revised version to the 2021 data status. For Postcodes of Kiev Households, Age bands and Unemployed persons in total. For Postcodes of Kiev Purchasing Power in total. For Postcodes of Kiev Consumer Spendings in total. Households are based on the per household values of the respective Raioni. Age Bands, Sex and Unemployed Persons are based on the per capita values of the respective Raioni. Purchasing Power is based on the per capita values of respective Raioni. Consumer Spending is based on the per capita values of respective Raioni.
