Change Summary

Changes to geography level names

None.

New Attributes

Attribute Name	Alias Name	Category
EDUC_BASE	2021 Education Attainment Base	Education

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2021 (before: 2020). Unemployed persons are shown for 2020 (before 2019). The Purchasing Power projections for 2021 show an upward trend compared to the projections for 2020. Consumer Spending 2021 shows deviations from 2020 with shifts within categories due to the different developments in the Covid-19 pandemic. Using new input data from the official statistics leads to deviations in Unemployment data as well as for Population and Households and the respective dependent variables.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

None.
