2020 SIC Code Re-assignment Process

In early 2020, Infogroup initiated a SIC Code re-assignment process of approximately 43,000 records in the U.S. to reduce duplication and provide an easier-to-use naming taxonomy.

Users of the Infogroup Business Locations data will notice some changes to the SIC code assignment and Sales Volume in businesses categorized within SIC 5812 Eating Places. Previously, Infogroup classified Eating Places into one of 45 different 6-digit SIC Codes. In Esri’s September 2020 update to Business Analyst and Community Analyst web apps, eating places are now classified into just eight different 6-digit SIC Codes using business type as a differentiator.

For example, barbecue restaurants were previously classified as *SIC 581224 Barbecue Restaurant*. Now, depending on the business type, these businesses will be classified as either:

- SIC 508406 Barbecue Equipment & Supplies (WHLS)
- SIC 541103 Convenience Stores
- SIC 581206 Foods-Carry Out
- SIC 581208 Restaurants

The following table indicates impacted SIC Codes:
