Esri Retail Demand by Industry

Esri U.S. Retail Demand data estimates spending in retail trade, food services, and drinking places industries. Data provide an understanding of *where* consumers are spending their dollars on an annual basis in 13 NAICS (North American Industry Classification System) Subsectors and 30 NAICS Industry Groups. Data include total expenditures by all households, average spending per household which represents the typical amount spent by household, and an index comparing spending to the U.S. average. Data are based on the latest Consumer Expenditure Surveys by the Bureau of Labor Statistics and the Economic Census by the U.S. Census Bureau. Use Retail Demand data to understand how dollars are being spent in retail and food establishments in your area of focus. Data are available for the U.S.

Esri Market Potential

Esri's 2023 Market Potential data measures the likely demand for a product or service in an area. With this release, Esri computes Market Potential by combining 2023 Tapestry™ Segmentation data with Doublebase® 2022 data from MRI-Simmons. Doublebase 2022 is an integration of information from four consumer surveys. Each survey respondent can be identified by Tapestry segment, so a rate of consumption by Tapestry segment can be determined for a product or service for any area.

What's New

- The Market Potential data have been updated to 2023.
- Esri expanded Market Potential to include attributes on food delivery/take-out, video streaming services, IM/video chat, digital payment services, and more.
- Removed attributes that are no longer applicable or replaced by other attributes.

With this change in surveys, some Esri product codes have been *removed* and some have been *added*. In addition, some product code descriptions have been changed.
