### WHO ARE WE?

*Laptops and Lattes* residents are predominantly single, well-educated professionals in business, finance, legal, computer, and entertainment occupations. They are affluent and partial to city living—and its amenities. Neighborhoods are densely populated, primarily located in the cities of large metropolitan areas. Many residents walk, bike, or use public transportation to get to work; a number work from home. Although single householders technically outnumber couples, this market includes a higher proportion of partner households, including the highest proportion of same-sex couples. Residents are more interested in the stock market than the housing market. *Laptops and Lattes* residents are cosmopolitan and connected—technologically savvy consumers. They are active and health conscious and care about the environment.

### OUR NEIGHBORHOOD

- 30-something single householders (Index 174), with a number of shared households (Index 246); low average household size of 1.87.
- City dwellers, primarily in apartment buildings: with 2–4 units (Index 186), 5–19 units (Index 218), or 20+ units (Index 533).
- Older housing, two out of three homes built before 1970; 40% built before 1940 (Index 311).
- Most households renter occupied, with average rent close to \$1,970 monthly (Index 189).
- Many owner-occupied homes valued at \$500,000+ (Index 533).
- Majority of households own no vehicle at 36% (Index 390) or one vehicle (41%).

### SOCIOECONOMIC TRAITS

- More than three out of four have a bachelor's degree or higher (Index 252).
- Labor force participation is high, more than 75%.
- Salaries are the primary source of income for most households, but self-employment income (Index 146) and investment income (Index 173) complement the salaries in this market.
- These are health-conscious consumers, who exercise regularly and pay attention to the nutritional value of the food they purchase.
- Environmentally conscientious but also image-conscious: both impact their purchasing.

Note: The Index represents the ratio of the segment rate to the US rate multiplied by 100. Consumer preferences are estimated from data by MRI-Simmons.
