WHO ARE WE?
NeWest Residents households are new to America and their careers, often with new, young families. Many are new to the English language; nearly one-third of households are linguistically isolated. As residents adopt the American way of life, many pursue risky employment opportunities for the benefit of their extended families. Long hours in blue-collar jobs, primarily in the service industry, are common. Skilled workers steer toward construction and manufacturing sectors. Female labor force participation is somewhat low.

OUR NEIGHBORHOOD
• Concentrated in larger metropolitan areas (over half a million people) in the South and West.
• Reside in mostly renter-occupied apartments in older, mid- to high-rise buildings. Over 80% of housing units were built before 1990. Rental rates are below the US average (Index 85).
• Half of all households have children, in either married-couple or single-parent families.
• With average household size exceeding three, presence of children less than 5 years old is high compared to the US average. Dependent children represent approximately one-third of the population.

SOCIOECONOMIC TRAITS
• Female labor participation is slightly lower than the US average, partially attributable to the language barrier in this diverse foreign-born market.
• Male labor force participation (Index 116) is compulsory for these new families.
• Working full-time in blue-collar jobs, this market works hard and dreams big. They seek adventure and take risks for the betterment of their families.
• They are automotive enthusiasts; if they had the savings, they would buy a used, but bold, fun-to-drive vehicle.

Note: The Index represents the ratio of the segment rate to the US rate multiplied by 100. Consumer preferences are estimated from data by MRI-Simmons.
