

StreetMap Premium for ArcGIS Locator Update Quick-Start Guide for Desktop and Enterprise

Prerequisites

Before using the StreetMap Premium for ArcGIS HERE Q2 2018 Locator Update, you must ensure that you have the correct versions of [ArcGIS Desktop](#) and/or [ArcGIS Enterprise](#) installed.

| StreetMap Premium Component | Software |
|-----------------------------|--|
| New locators for geocoding | ArcGIS Enterprise 10.6 or later ArcGIS Pro 2.1.3 or later |

For additional information, see [System Requirements for StreetMap Premium for ArcGIS](#) on the ArcGIS Enterprise website.

Note: The locators in the Locator Update are a new style of locators identical to the ones used for the ArcGIS Online World Geocoding Service. However, since StreetMap Premium utilizes primarily HERE data for the source of address data, and the ArcGIS Online World Geocoding Service utilizes HERE data plus other vendors or public sources of information, some countries' geocoding results may vary. When using these new locators, it is always highly recommended that you run the most recent releases of ArcGIS Pro and/or ArcGIS Enterprise. These locators will be released on a quarterly basis for all five StreetMap Premium regions (Asia Pacific, Europe, Latin America, Middle East and Africa, and North America).

Check the [Release Notes](#) that highlight some general information about the StreetMap Premium for ArcGIS HERE Q2 2018 Locator Update.

To check for any patches that may be related to this version of StreetMap Premium for ArcGIS, see [Patches and Service Packs for StreetMap Premium for ArcGIS](#) on the ArcGIS Enterprise website.

Setting up the StreetMap Premium for ArcGIS Locator Update

The StreetMap Premium for ArcGIS HERE Q2 2018 Locator Update includes the following content:

- **LocatorUpdate_Q218_Documentation.7z**—QuickStartGuide and Release Notes files

- **APHR_Q218_NewLocators.7z**—NewLocators folder for Asia Pacific region
- **EUHR_Q218_NewLocators.7z**—NewLocators folder for Europe region
- **LAHR_Q218_NewLocators.7z**—NewLocators folder for Latin America region
- **MAHR_Q218_NewLocators.7z**—NewLocators folder for Middle East and Africa region
- **NAHR_Q218_NewLocators.7z**—NewLocators folder for North America region

There are three steps required before you start using the StreetMap Premium for ArcGIS Locator Update:

1. [Copying StreetMap Premium for ArcGIS data to your hard drive](#)
2. [Provisioning the StreetMap Premium extension for Desktop](#)
3. [Registering the Streetmap Premium extension for Enterprise](#)

Step 1: Copying StreetMap Premium for ArcGIS data to your hard drive

- a. Create a new folder on your hard drive (for example, C:\StreetMap Premium). If you plan on working with several StreetMap Premium datasets, you should be more descriptive when naming the new folder. For example, you could use the geographic area or version number of the dataset as part of the folder name.
- b. **LocatorUpdate_Q218_Documentation.7z** from [My Esri](#) (or copy from the flash drive) to the new folder on your hard drive. Then, browse to the new folder using My Computer or Windows Explorer. If you do not already have 7-zip installed on your computer, you will need to install this free software from www.7-zip.org. Once 7-zip is installed on your computer, unzip **LocatorUpdate_Q218_Documentation.7z**. There will be two files: **QuickStartGuide** and **Release Notes** PDFs.
- c. To use the new locators for geocoding, first, download the file for your region named **<Region>HR_Q218_NewLocators.7z** from My Esri (or copy it from the flash drive) to the new folder on your hard drive. Then, browse to the new folder using My Computer or Windows Explorer. Unzip the file. There will be one **\NewLocators** folder created containing all the locator files for your region. For information on using the new locators for geocoding, open the **help.htm** file located in the **Documentation** folder for the North America HERE 2018 Release 2 product, and go to the "Geocoding addresses > About the new address locators for geocoding" topic.

Note: The StreetMap Premium for ArcGIS HERE Locator Updates will be released quarterly and before the scheduled 2018 and 2019 releases of the other four StreetMap Premium product regions (Asia Pacific, Europe, Latin America, and Middle East and Africa). Therefore, the **help.htm** topic "Geocoding addresses > About the new address locators for geocoding" will not yet be updated in all of

the current product documentation. In the meantime, users may refer to the North America HERE 2018 Release 2 product help.htm documentation for additional information on the new locators.

Note for geocoding users: Locator 7-zip files included with the My Esri download or shipped media (flash drive) now contain all locator files/all extensions. Esri Customer Service will no longer email a separate .zip file containing the locator files with *.loc extensions.

Step 2: Provisioning the StreetMap Premium extension for Desktop

When you purchase StreetMap Premium for ArcGIS, ArcGIS, you are entitled to the ArcGIS Pro StreetMap Premium extension for your region (i.e., Asia Pacific, Europe, Latin America, Middle East and Africa, or North America). The extensions are available through single use, concurrent use, and named user software licenses.

Using the new locators in ArcGIS Pro requires a StreetMap Premium extension. To check for the extension, navigate to Project > Licensing > Esri Extensions to view the list of extensions. Extensions that are grayed out are not available. Check with your organization's license administrator or Esri Customer Service if a StreetMap Premium extension is not available.

Step 3: Registering the StreetMap Premium extension for Enterprise

ArcGIS Enterprise version 10.6 or later (Windows and Linux)

Using the new locators in a geocoding service requires ArcGIS Enterprise 10.6 or later. In addition, it is necessary to have both an ArcGIS Pro Desktop and an ArcGIS Enterprise StreetMap Premium extension. Install the ArcGIS Enterprise StreetMap Premium extension with your authorization file using the Software Authorization for ArcGIS Server Wizard prior to publishing a new locator as a geocoding service through ArcGIS Pro. Check with your organization's license administrator or Esri Customer Service if you do not have either the ArcGIS Pro Desktop StreetMap Premium extension or the ArcGIS Enterprise StreetMap Premium authorization file.

More information about StreetMap Premium for ArcGIS Locator Update

For information about using the new locators for geocoding, refer to the help.htm file located in the [North America HERE 2018 Release 2 product documentation](#) for now until the other StreetMap Premium region's product documentation is updated.
