

RELEASE NOTES

These release notes highlight some general information about ArcGIS StreetMap Premium Europe 2021 Release 1 as well as the changes between 2021 Release 1 and 2020 Release 2. **Please see the Classic Locator Deprecation Notice at the end of this document. This is the last release that the Classic Locators will be included with ArcGIS StreetMap Premium Europe.**

1) System Requirements:

StreetMap Premium Component	Software
FGDB dataset for mapping and routing, and locators for geocoding	ArcGIS Desktop or ArcGIS Enterprise 10.7.1 or later ArcGIS Pro 2.6.4 or later

See <https://links.esri.com/streetmap-premium/2021/sys-reqs>

Note: There are two different sets of locators included in StreetMap Premium. The classic locators are the ones that have been included with StreetMap Premium over the last few years. The new locators are a new style of locators similar to the ones used for the ArcGIS Online World Geocoding Service. However, since StreetMap Premium utilizes primarily HERE data for the source of address data, and the ArcGIS Online World Geocoding Service utilizes HERE data plus other vendors or public sources of information, some countries' geocoding results may vary. When using these new locators, it is always highly recommended that you run the most recent releases of ArcGIS Pro and/or ArcGIS Enterprise.

2) Patches (strongly recommended):

- **10.7.1 Portal for ArcGIS Security 2020 Update 2 Patch** for addressing multiple security vulnerabilities found in Portal for ArcGIS.
See <https://links.esri.com/streetmap-premium/2021/current-patches>
- **10.7.1 ArcGIS Server Security 2020 Update 1 Patch** for addressing a security vulnerability found in ArcGIS Server.
See <https://links.esri.com/streetmap-premium/2021/current-patches>
- **10.8 Portal for ArcGIS Enterprise Sites Patch 1** for addressing issues with secured services in ArcGIS Enterprise Sites and downloading hosted feature services anonymously.
See <https://links.esri.com/streetmap-premium/2021/current-patches>
- **10.8.1 Portal for ArcGIS Enterprise Sites Patch 3** for addressing issues with secured services in ArcGIS Enterprise Sites and downloading hosted feature services anonymously. This patch is inclusive of Portal for ArcGIS 10.8.1 Enterprise Sites Patch 1 and 2.
See <https://links.esri.com/streetmap-premium/2021/current-patches>

- **ArcGIS (Desktop, Engine, Server) General Raster Security Patch** for addressing a security vulnerability found in ArcGIS.
See <https://links.esri.com/streetmap-premium/2021/current-patches>

3) My Esri Download or Media Contents:

- a. **EU_2021R1_Documentation.7z** - Documentation folder (contains Help.htm) QuickStartGuide and Release Notes files
- b. **EU_2021R1_FGDB.7z.[001...00n]** - MXD and StreetMap_Data folders
- c. **EU_2021R1_ClassicLocators.7z.[001...00n]** - ClassicLocators folder
- d. **EU_2021R1_NewLocators.7z.[001...00n]** - NewLocators folder

Refer to the QuickStartGuide.pdf for more information.

4) Data Size:

<u>2021R1:</u>	123.3GB;	<u>2020R2:</u>	121.9GB
a. FGDB dataset	47.6GB;		47.0GB
b. Classic Locators	49.6GB;		48.3GB
c. New Locators	26.1GB;		26.6GB

5) Dataset Changes:

FGDB

- i. Dataset based on HERE 2020 Q4 vintage.
- ii. Map Document (MXD) is provided in ArcGIS 10.7.1 version only for use with 10.7.1 or later versions.
- iii. The .sdlic license file and naming convention has changed to a 'rollover' licensing model. With this 'rollover' .sdlic license file, a new .sdlic file will not be needed for every separate release of StreetMap Premium. The same .sdlic file can be used for multiple releases until the subscription expiration date noted at the end of the .sdlic license file name. **The 'rollover' .sdlic license file is not backwards compatible. To use versions of StreetMap Premium file geodatabases prior to ArcGIS StreetMap Premium Europe 2021 Release 1, it is**

necessary to use the older version of the license file specific to that release.

The .sdlic license file naming convention previously followed this pattern:

<CustomerID><Product><Region><Year.Release><Geography><Functions>
<Expiration>, '11-smp-eu-**2020.2**-esp_prt-all-12_31_21.sdlic', for example, and
becomes:

<CustomerID><Product><Region><Rollover><Geography><Functions>
<Expiration>, '11-smp-eu-**rollover**-esp_prt-all-12_31_21.sdlic', for example.

The word 'rollover' replaces the 'year.release' component of the license file name. In addition to all of the StreetMap Premium documentation and My Esri downloads that identify the year and release of the file geodatabase, the Europe.gdb description/metadata properties have been updated to identify the year and release number. To view the year and release number, right-click the Europe.gdb in ArcGIS Pro > Catalog > View Metadata, or ArcMap > Catalog > Item Description, or select the Europe.gdb in ArcCatalog > Description tab.

Point Feature Classes

- iv. No changes

Line Feature Classes

- v. No changes

Polygon Feature Classes

- vi. No changes

Tables

- vii. **Reference_Landmarks** table added to provide natural guidance/enhanced directions at junctions using visible landmarks.

Refer to the Data Dictionary section in the Help.htm for more information.

6) Locator Changes:

- a. New Locators – With ArcGIS Pro 2.7 or later, locator properties include support for custom intersection connectors for single-country locators, as well as preferred city names and preferred street names.

- b. New Locators – Reference data added from providers Digital and Population Data Services Agency (Finnish Digital Agency) (FIN), Samsyn Ehf (ISL), GeoNorge/Kartverket (NOR) and Federal Office of Topography SwissTopo (CHE).
- c. The June 2020 Release of the ArcGIS Online World Geocoding Service changes the default location of PointAddress and SubAddress matches from the routing location on the street to the address location (parcel or rooftop centroid). Locators included with StreetMap Premium maintain the default location as the routing location, although users may change the default location in the locator properties.

Refer to the Geocoding addresses section ‘About the new address locators for geocoding’ in the Help.htm or <https://links.esri.com/streetmap-premium/new-locators> for more information.

7) Routing/Network Dataset Changes:

- a. Reference landmarks table added to provide natural guidance/enhanced directions at junctions using visible landmarks.
- b. DrivingSide (DRIVING_SIDE) descriptor attribute added to network attributes and will replace LeftDrivingSide descriptor attribute that will be deprecated in a future release.

Refer to the Routing section ‘About the routing services’ in the Help.htm for more information.

8) Deprecations:

Classic Locators Deprecation Notice

Starting the first quarter of 2021, the classic locators will be phased out and will no longer be included as part of ArcGIS StreetMap Premium. This will impact you if you use ArcMap, older versions of ArcGIS Enterprise, or have a custom workflow dependent on these locators. While Esri will continue to include the classic locators in the product until 2021, only the underlying data will be updated, and there will be no further enhancements to the locators.

The following releases will be the last release of the classic locators in ArcGIS StreetMap Premium.

Region	Final Release Version	Final Release Date
Middle East and Africa	2020 R1	Q1 2021
North America	2021 R1	Q2 2021
Europe	2021 R1	Q2 2021
Asia Pacific	2021 R1	Q3 2021
Latin America	2021 R1	Q3 2021
Japan	2020 R1	Q1 2021
