

## **RELEASE NOTES**

These release notes highlight some general information about ArcGIS StreetMap Premium North America 2020 Release 1 as well as the changes between 2020 Release 1 and 2019 Release 4. **Also, please see the Classic Locator Deprecation Notice at the end of this document.**

### **1) System Requirements:**

<b>StreetMap Premium Component</b>	<b>Software</b>
FGDB dataset for mapping and routing, and locators for geocoding	ArcGIS Desktop or ArcGIS Enterprise 10.6.1 or later ArcGIS Pro 2.4.3 or later

See <https://links.esri.com/streetmap-premium/2020/sys-reqs>

**Note:** There are two different sets of locators included in StreetMap Premium. The classic locators are the ones that have been included with StreetMap Premium over the last few years. The new locators are a new style of locators similar to the ones used for the ArcGIS Online World Geocoding Service. However, since StreetMap Premium utilizes primarily HERE data for the source of address data, and the ArcGIS Online World Geocoding Service utilizes HERE data plus other vendors or public sources of information, some countries' geocoding results may vary. When using these new locators, it is always highly recommended that you run the most recent releases of ArcGIS Pro and/or ArcGIS Enterprise.

### **2) Patches and Service Packs (strongly recommended):**

8) **Deprecations:**

**Classic Locators Deprecation Notice**

Starting the first quarter of 2021, the classic locators will be phased out and will no longer be included as part of ArcGIS StreetMap Premium. This will impact you if you use ArcMap, older versions of ArcGIS Enterprise, or have a custom workflow dependent on these locators. While Esri will continue to include the classic locators in the product until 2021, only the underlying data will be updated, and there will be no further enhancements to the locators.

The following releases will be the last release of the classic locators in ArcGIS StreetMap Premium. After these releases, the classic locators will remain available in My Esri for an additional year. They will not be updated during this period.
