

RELEASE NOTES

These release notes highlight some general information about the ArcGIS StreetMap Premium Q2 2020 Locator Update.

1) System Requirements:

StreetMap Premium Component	Software
New locators for geocoding	ArcGIS Enterprise 10.7.1 or later ArcGIS Pro 2.5.2 or later

See [System Requirements for ArcGIS StreetMap Premium](#) on the ArcGIS website.

Note: The locators in the Locator Update are a new style of locators similar to the ones used for the ArcGIS Online World Geocoding Service. However, since StreetMap Premium utilizes primarily HERE data for the source of address data, and the ArcGIS Online World Geocoding Service utilizes HERE data plus other vendors or public sources of information, some countries' geocoding results may vary. When using these new locators, it is always highly recommended that you run the most recent releases of ArcGIS Pro and/or ArcGIS Enterprise. These locators will be released on a quarterly basis for all five StreetMap Premium regions.

2) Patches (strongly recommended):

See [Patches for ArcGIS StreetMap Premium](#) on the ArcGIS website.

3) My Esri Download or Media Contents:

- a. **LocatorUpdate_Q220_Documentation.7z** - QuickStartGuide and Release Notes files
- b. **AP_Q220_NewLocators.7z** - NewLocators folder for Asia Pacific region
- c. **EU_Q220_NewLocators.7z** - NewLocators folder for Europe region
- d. **LA_Q220_NewLocators.7z** - NewLocators folder for Latin America region
- e. **MA_Q220_NewLocators.7z** - NewLocators folder for Middle East and Africa region
- f. **NA_Q220_NewLocators.7z** - NewLocators folder for North America region

Refer to the Quick-Start Guide-ArcGIS StreetMap Premium Q2 2020 Locator Update.pdf for more information.

4) Data Size:

Q2 2020:

- | | |
|---------------------------|--------|
| a. Asia Pacific | 17.8GB |
| b. Europe | 26.6GB |
| c. Latin America | 5.3GB |
| d. Middle East and Africa | 3.9GB |
| e. North America | 20.5GB |

5) Locator Changes:

- Reference dataset based on HERE 2020 Q2 vintage.
- Additional source data updates for the United States, including data provided by the GIS user community through the Community Maps for Addresses program.
- The June 2020 Release of the ArcGIS Online World Geocoding Service changes the default location of PointAddress and SubAddress matches from the routing location on the street to the address location (parcel or rooftop centroid). Locators included with StreetMap Premium maintain the default location as the routing location, although users may change the default location in the locator properties.
- See [What's new](#) on the ArcGIS website.

Refer to the Geocoding addresses section 'About the new address locators for geocoding' in the help.htm of the standard ArcGIS StreetMap Premium release for the latest information on new locators. See the [help and quick-start guide downloads](#) on the ArcGIS website.

6) Deprecations:

None
