StreetMap Premium for ArcGIS

Q1 2019 Locator Update   3 April 2019

RELEASE NOTES

These release notes highlight some general information about the SMP for ArcGIS Q119 Locator Update.

1) **System Requirements:**

StreetMap Premium Component	Software
New locators for geocoding	ArcGIS Enterprise 10.6 or later ArcGIS Pro 2.2.4 or later

See http://links.esri.com/streetmap-premium/2019/sys-reqs

Note: The locators in the Locator Update are a new style of locators identical to the ones used for the ArcGIS Online World Geocoding Service. However, since StreetMap Premium utilizes primarily HERE data for the source of address data, and the ArcGIS Online World Geocoding Service utilizes HERE data plus other vendors or public sources of information, some countries' geocoding results may vary.   When using these new locators, it is always highly recommended that you run the most recent releases of ArcGIS Pro and/or ArcGIS Enterprise. These locators will be released on a quarterly basis for all five StreetMap Premium regions.
