ArcGIS Desktop

[Top](#)

BUG-000114428	A reconcile and post fails for a specific version.
BUG-000088196	The Find tool prompts users to log in to an ArcGIS Online subscription account even when they are not using any Ready-To-Use Services.
BUG-000094113	The license error message is hard-coded.
BUG-000095233	Incorrect data frame transformation method in the Data Frame Properties dialog box when changing from the WGS1984 coordinate system to British National Grid (BNG).
BUG-000097148	Running the Synchronize Changes tool on a checkout geodatabase with 'Reconcile with the Parent Version' check box unchecked incorrectly removes the version and reconcile edits.
BUG-000098315	Sample returns Null data when the input raster is a mosaic dataset.
BUG-000103284	The Simplify Building tool does not reshape terraced housing in ArcGIS Desktop 10.5.
BUG-000103892	Geoprocessing script generates an image output with a missing Esri tile basemap when running the ConvertWebMapToMapDocument and ExportToPNG functions concurrently.
BUG-000103896	The saveACopy method in ArcPy does not create the same version as the one created when using the ArcMap GUI.
BUG-000105175	The Extract by Mask tool does not work as expected when working with selected polygons and displays vertical lines in the area outside the mask (polygon) limit.
BUG-000106314	The IRelationalOperator.Disjoint method returns inconsistent results.
BUG-000110221	Connecting to a PostgreSQL geodatabase causes ArcCatalog to crash.
BUG-000110487	Windows Groups receive the error message, "Layer is not editable, unknown error" when editing an existing ArcGIS project file.
BUG-000110574	Accessing a geodatabase's locks information returns the following error message in the Geodatabase Administration dialog box: "Column value is null."
BUG-000110684	Running the RasterToNumPyArray function with a raster layer created from a Web Coverage Service (WCS) returns the error message: "Error 999998: Unexpected Error."
BUG-000111481	The ArcMap Buffer Wizard crashes ArcMap 10.6 and 10.6.1.
BUG-000112083	When performing a spatial join between two feature classes with Global IDs and the output workspace is in a file geodatabase, the following error message is returned: "The Fields collection contained multiple Global ID fields."
BUG-000112976	Unable to define the layer extent when registering a spatial table with a geodatabase.
BUG-000112999	The Export to CAD tool in ArcGIS Desktop 10.6 does not create blocks in the output DWG file. This works successfully with the data provided in ArcGIS Desktop 10.5.1.

BUG-000113178	Derived mosaic dataset created using Compressed ARC Digitized Raster Graphics (CADRG) data does not show the raster data properly.
BUG-000113289	The ST_intersects query runs much slower when querying a geodatabase in Oracle after upgrading to a newer version.
BUG-000113306	Attempting to add a non-hosted ArcGIS Server feature service containing empty feature classes from an ArcGIS Server user connection to ArcMap returns the error message, "Could not add specified data object to the map."
BUG-000113336	Dialogs that include the font picker control, including the Layer Properties, Options, Character Marker Editor, and Label Manager open very slowly.
BUG-000113368	Euclidean allocation, distance, and direction tools are much slower in ArcMap 10.5 versus previous versions.
BUG-000113369	Mosaic datasets show areas of 'NoData' when using seamlines generated using an area of interest that does not intersect all of the mosaic's footprints.
BUG-000113493	The ACT feature does not upgrade when authorizing Drone2Map causing ArcGIS Pro concurrent use license to fail.
BUG-000113535	ArcGIS Desktop displays an incorrect record count in the attribute table of a point feature class within a SAP HANA database.
BUG-000113707	The ICursor.InsertRow method randomly inserts values in a table when the text field length is greater than 999 in an Oracle 12g geodatabase.
BUG-000113727	When exporting a joined feature layer with Global IDs in ArcMap, the following error message is returned: "Fields contain multiple global ids."
BUG-000113911	ArcMap does not export Arabic fonts (codepage supported) correctly to PDF file format.
BUG-000114001	NVA queries with a 'WHERE' clause containing a period (".") and without a spatial column does not complete.
BUG-000114115	Publishing a map service to a federated Portal for ArcGIS creates a new identical item when the map service 'Capabilities' are updated from ArcMap or ArcCatalog.
BUG-000114282	FME GeoPackage (.gpkg) line features are not visible if the feature layer is directly added to ArcMap.
BUG-000114319	When running the Lookup (Spatial Analyst) tool, the output raster only has one value whereas the 'Lookup Field' field has multiple values.
BUG-000114543	JPG2000 images with the WGS_1984 Mercator_1SP projection do not line up in ArcGIS Desktop.
BUG-000114807	The Reclass by Table tool provides incorrect output for raster integer inputs.
BUG-000114885	Street labels are occasionally drawn upside down.
BUG-000114886	Iteratively running the Create Constant Raster tool to create an integer output raster dataset fails to save at the third time.

BUG-000114964	Switching to JPEG compression causes nodata to display as black rather than transparent.
BUG-000114977	The Export Training Data For Deep Learning geoprocessing tool returns garbled text in the results with Japanese Locale in ArcGIS Pro 2.2.
BUG-000115103	ArcGIS Desktop crashes on importing changes when running on specific data.
BUG-000115147	When calling ITopologicalOperator::Buffer on a polygon, if the polygon is degenerated to a point, the buffer call crashes.
BUG-000115186	When importing a raster in an enterprise geodatabase, the following error message is returned: "ERROR 999999: Error executing function. No raster store is configurated. Not running inside a server process. Failed to execute (CopyRaster)."
BUG-000115265	One of the features found using the Spatial Filter tool is returned twice if the data source is a PostgreSQL geodatabase.
BUG-000115303	The Trace tool fails to trace features in ArcMap.
BUG-000115401	Incorrect attribute values are returned when a Cost attribute uses the Function Evaluator to scale another time-dependent Cost attribute.
BUG-000115412	The ArcGIS Online routing service does not honor the override settings when finding the best sequence.
BUG-000115580	ArcGIS License Server Administrator 'Diagnostic' and 'Status Inquiry' logs translate dates incorrectly.
BUG-000115600	ProjEng: Port of LCC - bug when there is a latitude of origin but missing 'Standard Parallel 1'.
BUG-000115619	The Create Thiessen Polygons tool fails with the error message, "Failed to execute. Parameters are not valid. Error 000308: Invalid Field Type" when Input Features have a Global ID field and the Output Fields parameter is set to 'All fields'.
BUG-000115691	Unable to use the Pansharpen function to combine or merge a colored elevation raster with a hillshade raster.
BUG-000115691	Unable to use the Pansharpen function to combine or merge a colored elevation raster with a hillshade raster.
BUG-000115801	In ArcMap 10.6.1, an error occurs when attempting to export data from the Table Of Contents for data stored in an enterprise geodatabase.
BUG-000115839	Non-catalogued/DSN-less connections from ArcGIS 10.6 hang when connecting to DB2 for z/OS databases when using fully qualified domain names (FQDN).
BUG-000115882	ArcGIS Server cannot register connections to two different DB2 databases made by the same user.
BUG-000115920	Unable to publish a hosted service to a specific folder in the My Content page in ArcGIS Online.
BUG-000115940	Excessive 'Fork' instructions in Driving Directions when passing through intersections with turning slips.
BUG-000116031	The Nautical Miles conversion value is incorrect in system\units.cpp.

BUG-000116047	The Cost Path tool produces incorrect output when a 'Flow Direction' raster is used as input for distance and backlink raster.
BUG-000116229	The State Plane projection, NAD 1983 StatePlane Texas South Central FIPS 4204 (US Feet) shows the wrong latitude of origin for an ECW file.
BUG-000116267	Adding a Local Government Information Model (LGIM) parcel fabric to a map is slow.
BUG-000116589	The Cost Path and Cost Path as Polyline tools with a 'Flow Direction' input for backlink raster runs slow.
BUG-000116620	A memory leak causes ArcMap to crash when updating callout lines with the Update Annotation tool.
BUG-000116644	A web map containing several map services with a large extent and high number of feature layers crashes ArcMap 10.6.1.
BUG-000116730	Fix SQL Server shapes' shell rotation, even when converting while shape validation is off.
BUG-000116811	Attempting to read the spatial reference of an LAS file with incorrect metadata information causes ArcGIS Pro and ArcGIS Server to crash.
BUG-000116872	Viewing the 'Collapse Related Features' rule properties alters/influences other rules.
BUG-000116909	Rasters fail to load when the dataframe coordinate system is set to GCS WGS 1984.
BUG-000116910	Enterprise Orthomapping workflow may fail to compute color correction for the underlying mosaic dataset because parallel compute statistics for the raster items failed.
BUG-000116912	When publishing a Web Coverage Service (WCS) to ArcGIS Server, the coverage name is not correct in the response of a WCS v2.0.1 GetCapabilities request if the coverage name is not set to the dataset's name when publishing.
BUG-000116915	The 'Compute Histograms' and the 'Compute Statistics Histograms' operations fail with raster rendering services.
BUG-000116916	Using the Build Seamlines tool with the 'Disparity' computation method for a mosaic dataset of scanned images produces incorrect results.
BUG-000116917	The Generate Raster tool using the classify function does not write the attribute table if the output is CRF in the cloud store.
BUG-000116939	In ArcMap 10.6.1, the Find and Find Routes tools initialize slowly and cause 'AppHang' exceptions in severe cases.
BUG-000117069	The ST_Transform function fails with the error message, "ORA-20002: Error converting spatial reference (SHAPE2)" when using the custom spatial reference identifier (SRID) and geogtran well-known identifier (WKID).
BUG-000117127	Printing a map from ArcMap using the ArcPress printer driver more than twice in the same session fails with an unexpected error.
BUG-000117173	The Polygon to Raster geoprocessing tool fails to overwrite outputs created in 'In_memory' workspace with ArcMap and ArcGIS Pro.

BUG-000117194	In some instances, creating a replica returns the following error message: "Safety level may not be changed inside a transaction."
BUG-000117271	ArcMap requests to GPServices that return large record sets does not download the results if the path to the map document is long.
BUG-000117455	The Pre-100AD date values in a database must not stop the display of the other valid rows in the table.
BUG-000117600	In some cases, route solver does not solve and returns an error message when the U-Turn policy is set at 'Only At Dead Ends' and the 'Reorder Stops To Find Optimal Route' option is enabled in the Network Analysis extension in ArcMap 10.6.
BUG-000117631	Add support for TLS version 1.2 and 1.1.
BUG-000117766	ProjEng: Factory object additions and changes for ArcGIS 10.7.
BUG-000117779	The US Address - One Range address locator style returns no value for Ref_ID.
BUG-000117827	Setting ISpatialIndex.AllowIndexing alters the ITopologicalOperator operations result.
BUG-000118134	Specific lines and curves overlapping causes the Trace tool to fail.
BUG-000118421	If there are non-English characters in a connection string, the Copy Raster tool returns the following error when importing a raster in an enterprise geodatabase, "ERROR 999999: Error executing function. No raster store is configured. Not running inside a server process. Failed to execute (CopyRaster)."
BUG-000118803	Unable to create a second geodatabase using the Database Server instance (SQL Server Express) connection if the first geodatabase is connected.
BUG-000118939	Importing Unicode data into a SAP HANA geodatabase fails with the error, "Inserted value too large for column" if the VARCHAR data type is used.
BUG-000119229	Update documentation strings (docstrings) to reflect the new mxd.saveACopy() version constants.
BUG-000119323	The Raster to Polygon tool with 'Create multipart features' enabled locks the output for editing.
BUG-000119419	Euclidean Direction using high resolution data produces incorrect output.
BUG-000119421	The Flow Distance tool produces 'NoData' for the majority of cells when the input surface raster is not hydro conditioned.
BUG-000119422	The Flow Distance tool in ArcMap's ModelBuilder does not display the 'FlowDistanceType' parameter.
BUG-000119423	The Watershed tool hangs when the processing extent is set to a single cell catchment.
BUG-000119424	The Zonal Geometry as Table and Zonal Geometry tools generate incorrect results when a field other than value is used. The logic for calculating zonal geometry properties is not correct, and may cause the software to crash.
BUG-000119485	ArcGIS Desktop 10.2.1 and the TLS 1.2 patch causes the environment to crash when attempting to open ArcMap or ArcCatalog.

BUG-000119493	The Sink tool creates two unique values for sink regions that are diagonally connected. This is incorrect as diagonally connected sinks must be identified with a single unique value.
BUG-000119534	The Path Distance Allocation tool produces incorrect results when the source characteristics are specified.
BUG-000119759	Improve the quality and performance of the Sample tool.
BUG-000119760	Improve the quality and performance of the Extract Values to Points and Extract Multi Values to Points tools.
BUG-000119993	Extraction tools return outputs with the incorrect spatial reference when an output coordinate system environment is set.
ENH-000113705	Provide the ability for the PostGIS extension to be installed in any schema and not be limited to the Public schema.
ENH-000116400	Ability to generate the portal.json from ArcGIS License Manager via the command line without a GUI.
ENH-000117992	Document how to enable ArcGIS License Manager to be started automatically on Red Hat Enterprise Linux server 7.x.
NIM097763	The abbreviation dictionary, used with the Maplex Labeling engine, does not translate keyword phrases (multiword strings) consistently when the phrases use repeated words.
NIM099771	Using the Import 3D Files tool with the 'Placement Points' parameter to define a spatial reference places all models at 0,0 instead of on the points.

ArcGIS Enterprise

Analysis

[Top](#)

BUG-000112515	Analysis tools fail with the following error message when input layers are from the Living Atlas: "<layer-name>" Expected to find comma, colon or start of array; state : endOfObject; buffer : }.
BUG-000116088	The Find Nearest tool fails to run with the error message, "Find Nearest Failed" when the ArcGIS Server hosting server is authorized with a Standard (Enterprise) license.
BUG-000119301	The Join Features analysis tool fails in the ArcGIS Enterprise portal when run between a GlobalID and GUID field, which contains identical values using hosted feature layers.
BUG-000120683	The Esri World Batch Geocoder no longer needs to be shared with Everyone to work in the "Geocode Locations from Table" MapViewer analysis tool.
BUG-000120813	When using the draw polygon option in standard analysis tools, after drawing a second polygon, the button does not toggle off.

ArcGIS Data Store

[Top](#)

BUG-000114229	BUG-000114229 The message “There is a database backup process running” is returned when running the ArcGIS Data Store configurebackuplocation utility.
BUG-000115617	BUG-000115617 Spatiotemporal Data Store Retention Policies are not honored on Linux environments.
BUG-000116290	BUG-000116290 Upgrade is resetting the ProductConfiguration.xml, which prevents ArcGIS Data Store from setting required permissions on certain directories after upgrade completes.
BUG-000116403	BUG-000116403 On Linux environments, the spatiotemporal data store is not honoring the rolling-index strategy for shrinking indices. Indices are always shrunk on a DAILY basis regardless of their rolling-strategy.
BUG-000117309	BUG-000117309 Unable to configure a standby machine for a relational ArcGIS Data Store after a large number of hosted feature services are published.
BUG-000117892	BUG-000117892 ArcGIS Data Store has a remote code execution vulnerability in the tile cache data store.

ArcGIS Enterprise Sites

[Top](#)

BUG-000115994	In Portal for ArcGIS 10.6.1, users cannot log-in to private sites on Internet Explorer 11.
BUG-000115995	Internationalization is not functional on dataset page in ArcGIS Sites.
BUG-000115996	Unable to chart data that is not anonymously shared.
BUG-000115997	Using the relative navigation to pages (per the documentation) results in broken links.
BUG-000115998	Missing CSS resource on JavaScript API pop-up messages for logins using sites in Portal for ArcGIS.
BUG-000115999	Race condition for private web maps sometimes causes a ArcGIS API for JavaScript popup for credentials despite having a cookie.
BUG-000116001	Remove reference to Open Data from ArcGIS sites in Portal for ArcGIS.
BUG-000116042	Unable to login to sites administrator over HTTP.
BUG-000116244	Items that are not shared with the selected group also appear while configuring Category Card using a group within ArcGIS Enterprise Sites.
BUG-000116386	For ArcGIS Enterprise Sites, when you attempt to access a secured site and are prompted to sign in, clicking the sign in button does nothing if the Portal is configured with anonymous access disabled.
BUG-000116641	Search does not work on page items within ArcGIS Enterprise Sites.

BUG-000118052	The thumbnail for items added via Gallery card fails to load when the ArcGIS Enterprise Site is shared with everyone.
BUG-000118214	The Category Link widget in ArcGIS Enterprise Sites does not show the correct URL when query by selected group.
BUG-000118281	Create webmap' and 'View metadata' generates incorrect URLs when accessed anonymously in an ArcGIS Enterprise Site.
BUG-000118385	Editing a site's item details "Term of Use" section after the site has been created does not update the "Custom License" section within the ArcGIS Enterprise site.
BUG-000118401	Unable to download a PDF from an ArcGIS Enterprise Site with the Download button.
BUG-000118641	Tag query configured for Category cards fails to return exact matches in ArcGIS Enterprise Sites.
BUG-000119180	Anonymously accessing an ArcGIS Enterprise Site displays default thumbnails for publicly shared items.

ArcGIS Web AppBuilder

[Top](#)

BUG-000103174	The Analysis widget in ArcGIS Online Web AppBuilder for ArcGIS hangs upon selection if an annotation layer is included in the map.
BUG-000107322	"Smart Editor Widget" feature select fails to switch between layers after loading/using the "Situational Awareness" widget.
BUG-000107653	In the Search widget of Web AppBuilder (Portal), setting the scale parameter is not honored in the resulting search extent.
BUG-000110700	Unique values dialog box fails to populate in the Web AppBuilder Filter widget for a large ArcGIS Server feature service.
BUG-000111424	Pop-ups display when switching between the Draw, Measurement, and Coordinate widgets.
BUG-000111897	Web AppBuilder Coordinate Widget gives incorrect results with 'some specific coordinates' when the default WGS84 is removed.
BUG-000113047	The name of a layer in the Layer List widget and created from the Analysis widget is duplicated.
BUG-000113422	When editing multiple features at once with the Smart Editor widget, the updates are not saved.
BUG-000114035	The Query widget does not export the time values to a CSV file in the Web AppBuilder for ArcGIS application in Portal for ArcGIS.
BUG-000115029	The 'Move mouse to get coordinates' statement must not display at the bottom left corner of the Web AppBuilder for ArcGIS application in mobile devices.
BUG-000116044	The legend in the Infographic widget in the dashboard theme in Web AppBuilder for ArcGIS in Portal for ArcGIS 10.6 does not use the field aliases configured in the web map if using the column chart template.
BUG-000116734	The Attribute Table widget selections are not consistently honored by the Edit widget.
BUG-000117053	The Info Summary widget does not update with consecutive updates to the Group Filter parameter when the 'show all features' option is enabled.

ENH-000099082	Allow the Time Slider widget to update start-time and end-time based on user's current local time.
ENH-000102309	Add Live Data options to Web AppBuilder Time Slider widget.
ENH-000112267	Enhance the Filter widget in WebAppBuilder such that a user can search for a common word that is contained in a unique values list and filter for all results simultaneously from each unique value that includes that common word.
ENH-000113401	Allow infographic widgets in Web AppBuilder Dashboard theme to show statistics of all filters that are turned on and not only one at a time.

Disaster Recovery

[Top](#)

BUG-000106694	The webgisdr utility fails to run when the PORTAL_ADMIN_URL or the services URL of any federated server is configured with Windows Authentication.
BUG-000112342	A webgisdr incremental restore fails when the spatiotemporal ArcGIS Data Store is registered to the hosting server.
BUG-000115304	BUG-000115304 In multiple ArcGIS Server machine sites, the ImportSite operation modifies the server machine property options pertaining to HTTPS on machines other than the one running the Importsite.
BUG-000116019	BUG-000116019 Typo in the word "DESCRIPTION" in the webgisdr utility usage.
BUG-000117633	BUG-000117633 In 10.6.1 and prior, the message bus platform service may not be initialized correctly in all environments
BUG-000120684	The webgisdr tool fails to join the standby portal during a restore if the primary machine's hostname starts with "arcgis".

Distributed Collaboration

[Top](#)

BUG-000114059	When a Web Map containing a Feature layer is shared to a Collaboration Group set to "send as copy" the feature layer will fail to copy over successfully.
BUG-000115648	A 10.5.1 Portal for ArcGIS Organization acting as a guest in a collaboration fails to reference hosted feature layers created from an xlsx file originating from a host 10.6 Portal for ArcGIS organization.
BUG-000116791	When performing collaboration by reference with very large datasets, size limitations on disk are encountered due to the large source data files that are copied over.
BUG-000117926	Synchronizing workspace fails in a collaboration when the content directory is on a cloud store for the guest Enterprise portal.
ENH-000086704	Provide the ability to share hosted feature service views with a collaboration.
ENH-000113841	Allow Insights for ArcGIS content to participate in Portal-to-Portal and Portal-to-ArcGIS Online Collaboration,

Documentation

[Top](#)

BUG-000093327	State in documentation that you cannot add a directory in ArcGIS Server Manager if the identifying name of the directory matches the actual directory path.
BUG-000107465	When building an AWS CloudFormation environment, the enterprise geodatabase credentials are not configured according to the documentation.
BUG-000115748	Indicate in ArcGIS Server documentation that deleting a service from Portal also deletes the service from Server (10.6.1 and later).

Enterprise Geodatabase

[Top](#)

BUG-000108065	True curves of feature class are densified into linear segments in the spatial view created.
BUG-000110487	Windows Groups receive Layer is not editable
BUG-000110574	Error "Column value is null" is encountered while accessing the locks information in geodatabase administration window.
BUG-000110679	Connecting to an Oracle enterprise geodatabase advances the sequence used to generate table REGISTRATION_ID.
BUG-000112171	Error 'ERROR 000152: This user-schema geodatabase contains registered data. Empty it before try to delete again.' when deleting a user-schema geodatabase using the Delete Schema Geodatabase geoprocessing tool.
BUG-000112976	Unable to define the layer extent when registering a spatial table with the geodatabase.
BUG-000113289	The ST_intersects query runs much slower when querying a geodatabase in Oracle after upgrading to a newer version.
BUG-000113535	ArcGIS Desktop displays an incorrect record count in the attribute table of a point feature class within a SAP HANA database.
BUG-000113696	Running ST_AsBinary on a Polygon with Specific Conditions Results in Lost Connection to PostgreSQL Database Using ST_Geometry.so Library
BUG-000113707	ICursor.InsertRow method randomly inserts values in table when text field length is greater than 999 in Oracle 12g geodatabase.
BUG-000113886	ST_Transform Fails When Run Using a Specific Set of SRID's Over Curves Containing Kinks or Almost Self Intersecting
BUG-000114001	NVA queries with a where clause containing ." and without a spatial column can hang"
BUG-000114282	FME Geopackage (.gpkg) line features are not visible if the feature layer is directly added to ArcMap.
BUG-000114806	In the ArcGIS Server REST API, the Create Replica is slowed when the service uses CH1903+_LV95 (2056).

BUG-000115047	Slow performance while drawing layers from SQLite database compared to File Geodatabase data.
BUG-000115079	Is_Versioned function filter logic fails to ensure unique record returns which results in ERROR: negative substring length not allowed" return when querying gdb_items.definition column in PostgreSQL."
BUG-000115265	spatial query: one of the features found using the spatial filter is returned twice with PostgreSQL geodatabase
BUG-000115420	The following error message, "Failed to connect. ORA-00933: SQL command not properly ended" is returned when a user with CREATE SESSION privilege attempts to make a connection from ArcGIS Pro or ArcMap to an Oracle database.
BUG-000115839	Non-cataloged / DSN-Less connections from ArcGIS 10.6 hang when connecting to DB2 for z/OS databases when using fully qualified domain names.
BUG-000115882	ArcGIS Server cannot register connections to two different DB2 databases made by the same user
BUG-000115897	Polygon and Line Feature Classes imported into PostgreSQL 10.3+ using the Feature Class to Feature Class tool fail to draw and throw 'Failure to access the DBMS server' error
BUG-000116603	Truncate Table GP tool crashes ArcCatalog when fully qualified sequence length exceeds 29
BUG-000116730	Fix SQL Server shapes' shell rotation even when converting with shape validation off
BUG-000117069	The ST_Transform function fails with the error message, "ORA-20002: Error converting spatial reference (SHAPE2)" when using the custom spatial reference identifier (SRID) and geogtran well-known identifier (WKID).
BUG-000117148	Create Enterprise Geodatabase tool allows a user to create a geodatabase in the default 'postgres' database, but a direct connect doesn't work with the 'postgres' database.
BUG-000117721	High rate of edit operations and reconciles generates lock contention on the sde.states table in the version_util procedure new_edit_state
BUG-000118159	"ERROR 001050 Either registered with geodatabase already or cannot open the dataset" with sdo_gtype "4402" spatial table while registering it with geodatabase.
BUG-000118939	Importing Unicode data into SAP HANA geodatabase fails with inserted value too large column" due to varchar data type being used"
ENH-000113705	Provide the ability for the PostGIS extension to be installed in any schema and not be limited to the Public schema.
ENH-000117943	Enable ArcGIS clients connecting to the Oracle 18c release
ENH-000120132	Support Azure SQL Database Managed Instance

NIM054334	Provide a warning message when deleting SE_ANNO_CAD_DATA column for CAD data in Oracle Geodatabase
NIM095718	Renaming a feature class does not update the g_table_name in the geometry_columns table.

Feature Services

[Top](#)

BUG-000105679	The ValidateSQL operation always returns the value 'true' when the data refers to the spatiotemporal data store for the hosted feature service.
BUG-000113654	Publishing a feature service to a Spatiotemporal Data Store converts boolean fields to string fields of length 0.
BUG-000113840	Publishing hosted feature layers in Portal for ArcGIS fails if the ArcGIS Data Store resides on a machine with the hostname containing two consecutive dashes ("--").
BUG-000116056	Exporting from a hosted feature layer item details page to a file geodatabase fails in ArcGIS Enterprise 10.6.1.
BUG-000116237	Specific feature class published with a layer definition query as a hosted feature service to ArcGIS Enterprise 10.6.1 returns incorrect results for spatial envelope query at REST.
BUG-000116972	Set the "supportsAttachmentsByUploadId" = false by default if add attachment using the uploadID parameter is not supported.
BUG-000120681	Querying using return distinct values and return count fails for query layers.
BUG-000120732	ReturnServiceEdits response does not return deletes, even though the delete was reported successful.
BUG-000120733	Vertical coordinate system (VCS) transformation not being applied correctly through the feature service.
BUG-000120734	Inserted features from a previous sync moved out of the replica extent are not included in the next sync as an update.
BUG-000120735	Replica resource will error when edits to attachments are performed before a replica is created.
BUG-000120736	Multipatch services published from ArcMap to standalone ArcGIS Server do not display in ArcGIS Pro.
ENH-000107671	Add an option to the deleteFeatures operation on the REST endpoint for ArcGIS Server to toggle whether objectIDs of deleted features are returned to the client.

GeoAnalytics

[Top](#)

BUG-000115868	GeoAnalytics Tools do not respect time zones formatted at the dataset level for big data file shares.
BUG-000116246	The option to choose a GeoAnalytics Server is available when there is no Hosting Server (ArcGIS Data Store) configured with the server.

BUG-000116687	Temporal filters created from tool parameters in Portal for ArcGIS Map Viewer are incorrectly formatted and cause tool failures.
BUG-000118168	Generating a manifest for the NYC taxi dataset in the tutorial doesn't return any datasets.
BUG-000119526	"Minimum number of points to be considered a cluster" parameter of Find Point Clusters is not honored in GeoAnalytics Tools.
BUG-000120680	Long string fields representing geometry or time in big data file shares cause failures writing to ArcGIS Data Store.
ENH-000112920	Provide the functionality of the 'Clip' tool in GeoAnalytics Server.
ENH-000116029	Provide clarification of 'Username' parameter of Register HDFS (Hadoop Distributed File System) as a big data file share in Server Manager.
ENH-000117611	Support all geometry relationships for the intersect method in Overlay Layers through REST.
ENH-000120679	Add support for Union in Overlay Layers through REST.

Geoprocessing Services

[Top](#)

BUG-000104843	Geoprocessing services fail to publish or restart if the 'View results with a map service' option is checked and the data source is a registered enterprise geodatabase.
BUG-000114882	There is a noticeable performance bottleneck associated with returning very large output result sets from geoprocessing services.

GIS Server

[Top](#)

BUG-000104306	When viewing data published from a federated ArcGIS Server in a Portal for ArcGIS 10.5 web map, the federated ArcGIS Server logs report the following severe-level messages even though the data is viewable and editable on the map: "Failed to return the service configuration 'Service_name.MapServer'."
BUG-000112070	During publishing, layers within each geometry must be sorted alphabetically.
BUG-000113625	Broken API Reference link in REST Services Directory when ArcGIS Server is configured to HTTPS Only.
BUG-000113688	Portal for ArcGIS 10.6 fails to set the ArcGIS Raster Analytics Server and returns the error 'Error while processing request. Internal error. JSON response not set.', if the Hosting Server HTTP security protocol has been updated to HTTPS Only.
BUG-000117453	Editing an ArcGIS Server System Service's settings in ArcGIS Server Manager incorrectly adds an item for this service in Portal and upon deletion of this portal item, renders the service unusable.
BUG-000119425	The 'SummarizeRasterWithin' and 'ConvertRasterToFeature' tasks in ArcGIS Image Server crashes when trying to directly read an input image service collocated on a cloud raster store.

ENH-000120740	Enable administrators to flag ArcGIS Server machines that are undergoing planned maintenance in order to allow load balancers to not send service requests to the machine for the duration of the maintenance.
ENH-000120741	Add "Duration of Job" to the results for geoprocessing job queries in ArcGIS Server Administrator Directory and ArcGIS Server Manager.
ENH-000120742	Prevent publishers from viewing or updating geoprocessing jobs in ArcGIS Server Administrator Directory and ArcGIS Server Manager.
ENH-000120749	Improve the performance of administrative and publishing operations in a multi-machine ArcGIS Server Site when some ArcGIS Server machines are down/unreachable.
ENH-000120750	Enable the SOC Heap Size to be configurable for individual services on ArcGIS Server.
ENH-000120778	Allow users to track all log entries pertaining to any request in ArcGIS Server.

Home Application

[Top](#)

BUG-000091680	Enterprise group membership detail display is inconsistent.
BUG-000097243	When a user logs in using a SAML enterprise account, the users first name and last name are not properly saved.
BUG-000106466	Provide the option to open items in ArcGIS Pro.
BUG-000107116	Related records fail to display from a web map's pop-up if a map service has "Allow assignment of unique numeric IDs for map service publishing" enabled.
BUG-000108020	In Portal for ArcGIS, when using SAML-based authentication (enterprise logins), initiating a logout from the ADFS identity provider does not log the user out of the Portal.
BUG-000108074	When adding users to a group within the Invite Users dialog box, the user search does not correctly query entered username values.
BUG-000111326	If a field has both Types and coded value domains, the types display rather than the coded value domain in the Map Viewer dropdown.
BUG-000111436	The Microsoft Excel file is excluded when filtering 'Files' under Item Type in the Contents pane.
BUG-000112414	When there are more than 25 groups in an organization with update capabilities the Share 'Access and update capabilities' list fails to display and order all groups.
BUG-000112456	When a hosted feature layer is shared to a group with update capabilities, the layer's item details page displays an incorrect sharing status for administrators who are not a member of the group.
BUG-000113395	The Shape_Area and Shape_Length fields are not populated when creating new features with a feature service template.
BUG-000113429	In Portal for ArcGIS 10.5.1, when choosing the Groups Owned by Others option from the Groups tab, an administrator is unable to view all groups in the organization.

BUG-000113963	The Last Name field displayed is empty while editing a user profile that has been upgraded from Portal for ArcGIS 10.3 to Portal for ArcGIS 10.6 in Japanese language.
BUG-000114391	Downloading Esri web app templates from the template's item details page in Portal for ArcGIS results in 404 Not Found error.
BUG-000114601	When a non-administrative user shares an item with a group, the administrator cannot see the names of the groups the item is shared with on the item details page.
BUG-000114657	In the Map Viewer, when viewing a publicly shared editable service as a restricted role user, the Edit button disappears after clicking the Modify Map button, but re-appears if the layer is added back to the map.
BUG-000115314	Publishing a layer with the pre-set Graduated Colors symbology does not allow creating additional features in Portal for ArcGIS.
BUG-000115874	Notify the user when sharing a web map that contains subscriber / premium content publicly.
BUG-000115964	BUG-000115964 The App Launcher becomes unavailable after the external content is disabled.
BUG-000116056	Exporting hosted feature services to a file geodatabase fails in ArcGIS Enterprise 10.6.1.
BUG-000116246	The option to choose a GeoAnalytics Server is available when there is no Hosting Server configured with the server.
BUG-000116533	Unable to update the 'Who can contribute content to the group' settings in Portal for ArcGIS 10.6 configured with SAML authentication.
BUG-000116534	Active Directory usernames that start with hyphens are not able to see their content owned within Portal for ArcGIS.
BUG-000116674	In Portal for ArcGIS 10.6.1 the "Forgot password?" option sends an excessive number of requests when loading the page.
BUG-000116687	Temporal filters created from tool parameters in Portal for ArcGIS Map Viewer are incorrectly formatted and cause tool failures.
BUG-000116820	The 'Geocode Locations from Table' analysis tool returns an error message, "Mapping locator fields with input data fields failed, please use another locator" when using a private geocode service.
BUG-000116870	Unable to share Insights Workbooks, Pages and Model items to Everyone.
BUG-000117193	Feature layer editing performance slows when the feature layer has hundreds of views.
BUG-000117298	Fields with a coded domain value in a view definition will display the coded value instead of the description if the fields have been defined.
BUG-000117425	Unable to take ArcGIS Pro licenses offline when the license expiration date is not synced with the Organization expiration date.
BUG-000117494	Members with a username that contains an '@' symbol are unable to update layer-level metadata for a service.
BUG-000117581	Choose Best Facilities analysis tool fails when generating facilities with an invalid demand value.
BUG-000117645	Changing an items owner and moving the item to a folder that contains an "&" ampersand creates a duplicate empty folder.

BUG-000117715	Unable to change owner of groups created from enterprise IDP groups.
BUG-000117959	When using the Google Chrome web browser, individual map service layers shift position in the Map Viewer.
BUG-000119220	Unable to update some group settings in Portal for ArcGIS configured with web authentication and an enterprise group store.
BUG-000119536	The Group Category filter does not work when applied in the 'Content > My Groups' page in ArcGIS Enterprise 10.6.1.
BUG-000120092	Unable to publish hosted feature layer from a service definition file after previously publishing a WFS layer from a hosted feature layer from the same service definition in Portal for ArcGIS.
BUG-000120181	listDependents for an item returns an empty resultset when the format is set to JSON.
BUG-000120403	Querying a hosted feature layer based on CURRENT_TIMESTAMP() fails with the error message, "No records found".
BUG-000120852	When authoring an arcade expression on a Hosted Table utilizing the \$feature operator, clicking Test does not validate the expression.
BUG-000120854	Unable to filter content by group categories on the Gallery page.
ENH-000092901	Allow global navigation hyperlinks in the Portal Home Application (Home, Gallery, Map, Scene, Groups, My Content, My Organization) to be opened in a new tab with mouse right-click.
ENH-000112128	When Portal for ArcGIS is configured with German language, update wording on the Geocoding menu list of countries option.
ENH-000112958	Provide ability to filter out Living Atlas content from the Portal's Gallery.
ENH-000114074	Add support for SAML enterprise groups when using Azure AD as the SAML Identity Provider.
ENH-000114171	Add support for configuring a refresh interval on table items.
ENH-000115825	Enhance documentation to indicate that only Esri content is offered in Living Atlas content configured in Portal for ArcGIS.
ENH-000119572	Remove the 'Leave Group' button for groups when the Portal for ArcGIS identity store is configured with active directory groups.
ENH-000120843	Provide support for updating URLs in a web scene to HTTPS.
ENH-000120844	In the Join Features analysis tool, allow users to define which record is kept in a one to one join.
ENH-000120845	Support three new data collection templates for natural resources.
ENH-000120847	Provide the ability to designate a web map for use in Collector for ArcGIS.
ENH-000120848	Support adding GeoPackages as an item in Portal for ArcGIS and ArcGIS Online.
ENH-000120855	Add support for publishing CSV data using MGRS and USNG coordinates.
ENH-000120856	Show the cache status for hosted scene layers on the Item Details Settings page.
ENH-000120857	Allow organization administrators to specify administrative contacts within their organization.
ENH-000120858	Support partially updating hosted scene layer caches.

ENH-000120873	When creating a view layer from a hosted feature layer, provide the option to preserve layer IDs when the parent layer contains non-sequential IDs.
ENH-000120874	Add ability to define an area of interest on hosted feature layer views.
ENH-000120875	Provide the ability to pause a future scheduled synchronization job.
ENH-000120876	Update the organization page to allow administrators to organize and find information.
ENH-000120877	Provide support for Hungarian and Catalan languages.
ENH-000120878	Provide the ability for map authors supporting offline field workflows to create map areas from web maps.
ENH-000120879	Support the ability to configure a refresh interval on tables in web maps.

Installation and Upgrades

[Top](#)

BUG-000113462	If the content directory in Portal for ArcGIS is set to a folder name other than "content", upgrading Portal will result in a "content" folder being created in the parent directory of the original content directory.
BUG-000116290	Upgrade is resetting the ProductConfiguration.xml, which prevents ArcGIS Data Store from setting required permissions on certain directories after upgrade completes.

Linux

[Top](#)

BUG-000115618	Route Event layer created through a string/text based Route identifier stored in an Oracle geodatabase fails to get queried as a service on ArcGIS Server on Linux.
BUG-000115640	Failed to register a SQL Server database with ArcGIS Server using the MS ODBC Driver 17.
BUG-000120686	PrintingTools on ArcGIS Server Linux fail to print any web map after importing a root or an intermediate certificate until ArcGIS Server is restarted.
BUG-000120737	Building cache tiles does not complete on ArcGIS Server Linux when label expressions are used.
BUG-000120738	Software Authorization Wizard fails to authorize software in a headless environment on Linux.
BUG-000120739	Check system limits using serverdiag, portaldia, and datastorediag on Linux will fail when the limits are set to unlimited.

Living Atlas

[Top](#)

ENH-000120811	Living Atlas content in Enterprise portal now has three new badges "Authoritative", "Living Atlas" and "Deprecated".
ENH-000120812	Individual sublayer(s) from Esri boundary layer can be chosen to run feature analysis tools Map Viewer.

Manager

[Top](#)

BUG-000088964	ArcGIS Server Manager does not show supported operations when the Server Object Extension (SOE) has custom property page.
BUG-000105048	When search for services within the System folder, incorrect results are returned.
BUG-000107252	Tile origin values are displayed incorrectly for cached map services in ArcGIS Server manager.
BUG-000116069	Within ArcGIS Server Manager, administrators are able to change the sharing properties of a hosted service owned by another user when the service has been moved to a content subfolder in Portal for ArcGIS.
BUG-000118991	Unable to open the Caching tab for a tiled map service in IE 11.
BUG-000120815	Update labels for WFS 'Force axis order' property.
BUG-000120821	Do not allow GetCapabilities and GetMap operations to be disabled for Web Map Service (WMS) services in Manager as they are required.
ENH-000112328	Display the expiration date for each licensed ArcGIS Server role.
ENH-000120816	When adding a new dynamic workspace to a Map Service published from ArcGIS Pro, provide option to add a 'Layers Folder' workspace type.
ENH-000120817	Support querying by Request ID on the Logs page in ArcGIS Server Manager.
ENH-000120818	Add IdentifyTolerancePixel and listCustomCRS properties to WMS service capabilities page.
ENH-000120819	Add 'Authoring Application' property to the General tab to indicate if a service was published within ArcMap or ArcGIS Pro.
ENH-000120823	Provide a page for viewing and updating the status of current geoprocessing jobs in ArcGIS Server Manager.

Map Services

[Top](#)

BUG-000102113	TrueCurve geometry polygon features in a map service cause the GeoJSON-output REST query to fail, but HTML or JSON-output queries succeed.
---------------	--

BUG-000114191	When running the Export Map operation at the REST endpoint of a map service published from a versioned dimension feature class in a geodatabase, the operation fails to return the features created in a child version when that child version is specified in the Geodatabase Version Name parameter.
BUG-000119203	In map services published from feature classes symbolized by a representation with markers between dashed lines, the markers are misplaced if the 'Endings' property is set to 'No constraint'.

OGC Services

[Top](#)

BUG-000094022	In ArcGIS Server Manager, block the ability to disable the GetCapabilities and GetMap operations on WMS services.
BUG-000100098	Web Map Service (WMS) GetLegendGraphic request fails if the Style Layer Descriptor (SLD) XML file used has more than 256 'sld:Rule' elements.
BUG-000109142	The GetFeature request to a Web Feature Service (WFS) service shows a comma instead of a space between a coordinate pair in gml:boundedBy tag only when defining the WFS version as 1.0.0.
BUG-000113853	The Web Feature Service (WFS) 'Within' filter does not return any objects when used.
BUG-000114095	ArcGIS Server transactional WFS services (WFS-T) do not allow the application of the value NULL in a Transaction Update operation when the field is numeric and nullable.
BUG-000114589	A Web Feature Service (WFS) GetFeature request fails in ArcGIS Server 10.6 if the data contains large amount of features.
BUG-000115772	When utilizing the GetFeature URL query on a Web Feature Service (WFS) containing more than 300,000 features, the query fails after attempting to run indefinitely.
BUG-000118118	Web Map Service (WMS) services crash with the error, "Error occurred while processing request" when the source data includes certain NetCDF datasets in map or image services are enabled.
BUG-000118404	POST requests to Web Feature Service (WFS) 2.0 services that use stored queries fail with a 400 error.
BUG-000119921	The GetFeature request to Web Feature Service (WFS) version 1.0.0 shows a comma instead of a space between a coordinate pair in the gml:boundedby tag.
NIM062279	Consider implementing group layers for Web Map Services (WMS).

Ortho Maker

[Top](#)

BUG-000120954	Block Adjustment fails in Ortho Maker when installed on a non-English operating system.
---------------	---

ENH-000120950	Add support for generating reports in PDF format from Ortho Maker.
ENH-000120951	Add support for importing ground control points from a feature service.
ENH-000120952	Add a tool for performing volume calculations to Ortho Maker.
ENH-000120953	Provide validation for Principal Point, Konrady and Decentering options on the Edit Camera Information dialog in Ortho Maker.

Publishing

[Top](#)

BUG-000112070	During publishing, layers within each geometry must be sorted alphabetically.
BUG-000113352	When trying to overwrite a service from ArcGIS Pro, an error message is returned, "Failed to publish web layer".
BUG-000118697	Display Field setting is not honored in REST service properties when the layer is published from ArcGIS Pro referencing data stored in an enterprise geodatabase.
BUG-000120674	Publishing hosted elevation layers using tile packages causes the Portal Home Application to hang.

Scene Viewer and 3D

[Top](#)

BUG-000115514	Legend toggle is not available for tile layers.
ENH-000103534	Feature Search capability in Web Scenes.
ENH-000111432	Remove Living Atlas content out of the search result when users search content in the portal organization.
ENH-000113132	Additional 2D icons for web scenes.

Security

[Top](#)

BUG-000096790	Entering an invalid format for the Subject Alternative Name parameter while creating a self-signed certificate in Portal for ArcGIS does not return an error, and the certificate is not created.
BUG-000097243	When logging in using a SAML enterprise account, the user's first name(givenName) and last name(surName) attributes sent in the SAML assertion response are not saved.
BUG-000102986	Passwords with '<' or '>' fails when setting LDAP as the identity store for ArcGIS Server.
BUG-000107534	SSL Certificates with special characters in the password fails to import to ArcGIS Server.
BUG-000108020	In Portal for ArcGIS, when using SAML-based authentication (enterprise logins), initiating a logout from the ADFS identity provider does not log the user out of the Portal.
BUG-000110546	Security Configuration in ArcGIS GIS Server fails to use Windows domain accounts when the password contains the special character '<' or '>'.

BUG-000112641	Invalid login attempts in the Portal for ArcGIS Home page are not captured in the portal logs.
BUG-000112707	Reflected cross-site scripting (XSS) in Portal for ArcGIS Home application.
BUG-000114895	Importing duplicate certificates with different aliases prevents the new certificate from being exported.
BUG-000117367	Unvalidated redirect in Portal for ArcGIS.
BUG-000117369	Reflected cross-site scripting (XSS) in Portal for ArcGIS.
BUG-000117372	Cross-site scripting (XSS) vulnerability in ArcGIS Server Administrator Directory.
BUG-000117564	Privilege escalation vulnerability.
BUG-000117983	Access control issue in the ArcGIS Server tile handler.
BUG-000120333	Reflected cross-site scripting (XSS) in the Portal for ArcGIS Home application.
BUG-000120337	Unvalidated redirect issue in Portal for ArcGIS.
ENH-000114074	Add support for SAML enterprise groups when using Azure AD as the SAML Identity Provider.
ENH-000116621	Add the ability to modify the maximum token expiration time of tokens generated to login to Portal for ArcGIS when using IDP-initiated logins.

Templates

[Top](#)

BUG-000112828	A Web App created using the Public Information template does not honor the ArcGIS Online Organizational account settings for a scale bar.
BUG-000113745	Minimal gallery must allow filter by item type.
BUG-000114351	Heat map does not display in print preview of StoryMap Cascade.
BUG-000115144	Viewing applications created from ArcGIS Online on mobile devices redirect the URLs to the Content page.
BUG-000115893	Multiple pins appear in Geoform map if searching more than one address, and cannot be cleared. Only the last pin added will be submitted.
ENH-000115632	Allow "Minimal Gallery" App to prompt users to log into AGOL if there is non-public content in the gallery.
ENH-000120676	Minimal Gallery: Provide option to open document link item types instead of opening their item page.
ENH-000120677	Add the locate button widget to the configuration of Media Map.

ArcGIS Data Reviewer

[Top](#)

BUG-000113046	Error encountered when using the WMXReviewer.StartSession command with the LaunchArcMap step in ArcGIS Workflow Manager and the Reviewer session no longer exists.
---------------	--

BUG-000114123	Incorrect string values for custom spatial relationships in Types of spatial relationships that can be validated topic.
BUG-000114341	Data Reviewer Version Differences fails with the error message, "An unexpected error occurred" when inserts between two versions have the same Object ID.
BUG-000115606	ArcMap crash with Valency check that contains a comparison rule and a where clause that references a string field.
BUG-000118435	Connectivity Rules check returns incorrect results with edge-edge Geometric Network connectivity rule.
BUG-000118824	The Execute Reviewer Batch Job geoprocessing tool's Changed Features Only option is not honored when set as a model parameter.

ArcGIS Monitor

[Top](#)

BUG-000116732	ArcGIS Monitor Administrator repeats the following error "User: "user" failed to create. Username already exists" upon opening a connection, once adding a duplicate user fails.
BUG-000116955	Post install of ArcGIS Monitor does not update the password after installation and displays the default password.
BUG-000117264	ArcGIS Monitor fails to add HTTP Counter for a file type JSON Hosted on the IIS Server.
BUG-000118926	Running Programs and Features repair process for ArcGIS Monitor corrupts the ArcGIS Monitor installation.
ENH-000119178	Add more detailed instructions for configuring SSL Certificates with ArcGIS Monitor.

ArcGIS Workflow Manager

[Top](#)

BUG-000112087	(Server) Changes to the field order of the extended properties table are not reflected in the ArcGIS Workflow Manager for Server Javascript Viewer.
BUG-000114825	(Desktop) The Job Query Results window in ArcGIS Workflow Manager Desktop does not honor the Order By clause.
BUG-000115160	(Server) Unable to Retrieve Portal Users from Workflow Manager REST endpoint when user is logged in.
BUG-000115520	(Desktop) Locks on a file geodatabase do not release after the Define LOI workflow is executed.
BUG-000116384	(Desktop) The All Jobs general query does not return any records.
TFS 57805	(Desktop) Allow Python for Portal users.
TFS58127	(Desktop) Replication fails when using the Portal user store.

GeoEvent Server

[Top](#)

BUG-000097348	Event Volume Controller Processor logs an error "java.lang.StackTraceElement" for each unique GeoEvent.
---------------	---

BUG-000108197	GeoJSON adapter is converting zero values ingest as Date to negative epoch values.
BUG-000112333	Hosted feature service discovery fails to include feature service's feature layers.
BUG-000113969	The Replace All GeoFences in Category checkbox always shows as checked in the Edit GeoFence Synchronization Rule window.
BUG-000114501	Address known vulnerabilities in versions of the Jackson libraries used in GeoEvent Server 10.6.1.
BUG-000117348	Spatiotemporal big data store map services do not honor False specification of the HasLiveData parameter.
BUG-000117360	Web maps are slow to load when HasLiveData is set to true for spatiotemporal big data store hosted feature services.
BUG-000119717	GeoEvent Service validation fails to catch loops in Apache Camel routes.
ENH-000116592	Update spatiotemporal big data store and relational feature service publishing workflows to support hosted feature layer views.
ENH-000118941	Feature services published with HasZ option checked are not z-enabled when published to a local non-hosted server.
