## ArcGIS Enterprise 11.1 Issues Addressed List

### ArcGIS Data Store

[Top](#)

BUG-000139271	The changenosqlslocation utility tool does not honor locations if set to a network share.
BUG-000150069	Scene layers fail to publish after changing the tile cache data store to cluster mode.
ENH-000152740	Add a timestamp to the db log in ArcGIS Data Store.

### ArcGIS Enterprise Portal

#### Analysis

[Top](#)

BUG-000136857	Running a custom web tool in Map Viewer with a synchronous execution mode runs indefinitely.
BUG-000141865	The Spatial Analysis tools stop working when you install ArcGIS Pro and ArcGIS Data Interoperability extension on the same machine as ArcGIS Enterprise.
BUG-000156820	When summarizing lines and polygons using Summarize Within and Summarize Nearby, the summary statistics should not have intermediary rounding.
ENH-000156819	Support setting the spatial reference of the output of Create Viewshed, Create Watershed, and Trace Downstream tools.

### ArcGIS Dashboards

[Top](#)

BUG-000139520	The ArcGIS Dashboards category selector does not work on a hosted feature layer with points using the heat map symbology.
BUG-000150228	In ArcGIS Dashboards, the Browse Features option is missing when Clustering is enabled.
BUG-000151187	The ArcGIS Dashboards Category selector filter does not find all cases of a substring when filtering categories.
BUG-000151969	Filter actions from category selectors that target a map service no longer send query requests to the map service in ArcGIS Enterprise.
ENH-000116157	Provide the ability to enable filtering on the List widget in ArcGIS Dashboards.
ENH-000134450	Provide the ability in ArcGIS Dashboards to reset dashboards, including selectors and map.
ENH-000152177	In ArcGIS Dashboards, allow pop-ups for referenced feature services to display attachment previews.

## ArcGIS Enterprise 11.1 Issues Addressed List

### ArcGIS Experience Builder

[Top](#)

BUG-000134729	The ArcGIS Survey123 survey embedded in an ArcGIS Experience Builder project does not stay on the 'thank you' screen when the survey is submitted.
BUG-000136690	The automatically submitted Survey123 forms reload in the Survey123 widget in ArcGIS Experience Builder.
BUG-000136980	URL links are not live in the Table widget in ArcGIS Experience Builder.
BUG-000139624	Expanding the Map widget with the Fullscreen tool sends it behind other widgets in ArcGIS Experience Builder on iOS device.
BUG-000139635	The City GeoHub template in ArcGIS Experience Builder does not load in ArcGIS Enterprise 10.8.1 when launched.
BUG-000140037	The web map's Search widget from one page stays visible on another page when clicked prior to switching pages in ArcGIS Experience Builder.
BUG-000141100	The 'Zoom to' functionality does not work with grouped layers in ArcGIS Experience Builder.
BUG-000141894	The Embed widget does not allow the users to embed public or secure web apps or ArcGIS Dashboards from within their own organization.
BUG-000143756	The error message, "Page Unresponsive" is returned in ArcGIS Experience Builder when trying to style the Chart widget that is small sizes.
BUG-000144354	In ArcGIS Experience Builder, the Chart widget displays the field name instead of the alias when hovering over data.
BUG-000145682	When using the full-screen tool in the Map widget in an ArcGIS Experience Builder experience on a mobile device, the user is unable to do anything and does not receive feedback on the map until the browser is refreshed.
BUG-000146013	ArcGIS Experience Builder pages cannot be refreshed if the page name contains a period (full stop).
BUG-000146185	ArcGIS Experience Builder in an edit mode is unable to select data for the list using a 1366x768 px monitor.
BUG-000146252	In ArcGIS Experience Builder, the Map Layers widget redirects to the layer's REST endpoint instead of the item details page when the 'View layer details' option for the widget is enabled and clicked.
BUG-000146851	When using ArcGIS Experience Builder within ArcGIS Enterprise, the ArcGIS Online templates do not load.
BUG-000147945	Unable to save an existing app as a new copy in ArcGIS Experience Builder unless a change is made to the app or the browser window is resized.
BUG-000148021	In the ArcGIS Experience Builder Edit widget, the snapping tool window is cut off from the screen and makes it difficult to edit features.
BUG-000148336	In ArcGIS Experience Builder, the Date fields display the time in epoch format when used as a custom header for the result.
BUG-000148393	In ArcGIS Experience Builder, the Map widget Select tool requires a selection to be performed twice to register in the Query widget as selected features.
BUG-000148625	ArcGIS Experience Builder Developer Edition v1.8 accesses ArcGIS JavaScript API libraries which are deprecated on July 2021.

## ArcGIS Enterprise 11.1 Issues Addressed List

BUG-000148719	In ArcGIS Experience Builder, the theme colors of the experience do not apply to the Edit widget. The widget has a light theme outside of the Map widget but has a dark theme on top of the Map widget.
BUG-000148813	The ArcGIS Experience Builder Edit widget's 'Create features' and 'Edit features' sections remain even though these capabilities have been disabled in the widget's layer configuration.
BUG-000149020	Adding a Dynamic Image widget to a view that is linked to a List widget button prevents items from being selected in the List widget if it is filtered by a 'contains' SQL Expression.
BUG-000149073	Selecting a feature from the List widget zooms to the north of the actual location on the map in ArcGIS Experience Builder.
BUG-000149257	Unable to use the data inside the subgroups in the ArcGIS Experience Builder Filter widget.
BUG-000149283	The ArcGIS Experience Builder Table widget reloads every time an edit is made and loses the position that the table was scrolled to initially.
BUG-000149720	In ArcGIS Experience Builder, the List and Image widgets do not show the option to dynamically display feature service attachments when the service is published using ArcMap.
BUG-000149879	Unable to export certain fields only from the Table widget in ArcGIS Experience Builder.
BUG-000150229	The Search widget in ArcGIS Experience Builder zooms to the wrong location when a custom zoom scale is set.
BUG-000150392	Unable to pass a field or question from the Survey widget to another window in ArcGIS Experience Builder.
BUG-000150412	The Web Map zooms to an incorrect location when using the List widget actions with a custom zoom scale and a custom projection layer in ArcGIS Experience Builder.
BUG-000150780	After selecting an editable layer in the Map widget using the Edit Widget, non-editable map services are allowed to be highlighted in the ArcGIS Experience Builder. Then a [Map Service Name]-highlight layer is added to the Edit Widget.
BUG-000151102	In ArcGIS Experience Builder, when a SQL Expression is made for the Filter widget that is configured to show a drop-down list of options which can have multiple selections based on what was previously selected in the filter expression, only one value is allowed to be selected rather than multiple.
BUG-000151229	The Measure tool in the ArcGIS Experience Builder web map does not display the 'Start to measure' message or the New Measure button when initially changing between the Line Measure and Polygon Measure tabs, and does not display measurement information when changing back.
BUG-000151427	ArcGIS Experience Builder is unable to display data that are in nested groups.
BUG-000151512	Adding more than one feature using the Edit widget in ArcGIS Experience Builder does not return back to the general widget page.
BUG-000151525	The Chart widget is unable to display the graphs or values when selecting a ST_Length (shape) field under the category field dropdown list in ArcGIS Experience Builder Developer Edition 1.9.
BUG-000151594	In ArcGIS Experience Builder, the Widget Controller widget is unresponsive when placed at the bottom portion of the screen for a small device layout.
BUG-000151855	Expanding the Map widget with the Fullscreen tool sends it behind other widgets in ArcGIS Experience Builder.
BUG-000152554	The data of the second sheet in the Table widget of ArcGIS Experience Builder does not load for the first time.
BUG-000152670	Map element in ArcGIS Experience Builder queries the map service sublayers individually instead of the map service as a whole.

## ArcGIS Enterprise 11.1 Issues Addressed List

BUG-000152803	ArcGIS Experience Builder changes the selected query dates to UTC from local time when using the Query widget on a Date field.
BUG-000153619	Map tools do not automatically close when switching to a new page.
BUG-000153650	The content embedded using code in the ArcGIS Experience Builder Embed widget is not loading.
BUG-000153727	The ArcGIS Experience Builder Search widget does not show suggestions in the published application.
BUG-000153765	Page elements in a Card within a Widget Controller cannot be edited if it is contained in certain layout elements
BUG-000153887	When using 3D data in ArcGIS Experience Builder, the Filter widget does not honor any SQL expression for any field type.
BUG-000153893	The Coordinates widget in ArcGIS Experience Builder matches the Well-Known ID (WKID) with the datum, while the Coordinate widget in ArcGIS Web AppBuilder matches the Well-Known ID (WKID) with the datum transformation (referenced in the developer documentation).
BUG-000154008	Custom widgets with translations do not work in ArcGIS Experience Builder.
ENH-000135572	Allow users to disable auto-refresh after submitting a survey in the Survey123 Widget for Experience Builder.
ENH-000138949	Provide the ability to choose a color to highlight and broaden up the ArcGIS Experience Builder Query Widget output features.
ENH-000140277	Enhance the coordinates of the cursor to update as it moves across a map.
ENH-000140740	Add a Time Slider Widget for Temporal data in Experience Builder.
ENH-000142818	Change error message display in ArcGIS Experience Builder for when device operating system is not compatible.
ENH-000144449	Provide the ability to toggle labels on/off for layers (hosted and GIS Server services) via the Map Layers widget in ArcGIS Experience Builder, in the manner akin to how hosted feature services can already be toggled (via the Layer List menu ... hide labels /show labels buttons) in ArcGIS Web AppBuilder.
ENH-000145065	Provide the ability to add an option where the fill is transparent, and the selection color is applied only to the outline of the selected feature.
ENH-000145105	Increase record export limit for the Table widget in ArcGIS Experience Builder.
ENH-000145727	Provide the ability to configure layer and legend visibility in Experience Builder Section Views instead of inheriting the visibility from the web map.
ENH-000156839	Support the ability to export and import ArcGIS Experience Builder applications into groups.

### ArcGIS Web AppBuilder

[Top](#)

BUG-000118492	The pop-up windows of selected features from the Query widget are shown in the wrong location in ArcGIS Web AppBuilder.
BUG-000119846	The Web AppBuilder for ArcGIS application fails to print when the Basemap Gallery widget is used to toggle between Web Map Tile Service (WMTS) basemaps using the non-Web Mercator (Auxiliary Sphere) projection.

## ArcGIS Enterprise 11.1 Issues Addressed List

BUG-000120210	The Query widget in the Web AppBuilder for ArcGIS application does not honor Arcade expressions configured in the pop-up setting for a web map feature layer even when the option to use the web map layer pop-up configuration is checked for the Query widget.
BUG-000127194	In ArcGIS Web AppBuilder, the hyperlink in an attribute table is not shown when it is configured using the attribute expression. The hyperlink is shown in the pop-up window.
BUG-000129166	The GUID field is not populated consistently with a value when creating a related record using the Edit widget in ArcGIS Web AppBuilder. Only the first edit to the related table or feature is populated.
BUG-000138071	The Info Summary widget does not update with consecutive updates to the Group Filter parameter.
BUG-000141885	The ArcGIS Web AppBuilder application shows blank values in the attribute table if a domain is removed from the feature layer.
BUG-000142090	Unable to add a related record using the Edit widget for a feature layer having a one-to-many relationship.
BUG-000143687	The basemap with a projection other than WGS84 is not displayed in the Basemap Gallery widget in ArcGIS Web AppBuilder but is viewable in the web map, although the initial web map of the basemap is the same projection.
BUG-000145267	In ArcGIS Web AppBuilder, the Edit widget fails to add related features to the original features after adding the first feature with related records.
BUG-000147383	When coded value domains and associated subtypes in a hosted feature layer are edited in ArcGIS Web AppBuilder using the Edit widget, amending the coded value field does not display the correct subtype values in the drop-down.
BUG-000148304	Domain decimal values get truncated by the Filter widget in ArcGIS Web AppBuilder.
BUG-000151116	Some of the Western Australia's spatial reference Well-Known IDs (WKIDs) are not recognized as valid in the ArcGIS Web AppBuilder Print widget.
BUG-000151592	All records in a non-spatial related table are exported to CSV files when using the Attribute Table widget in ArcGIS Web AppBuilder.
BUG-000153637	The Print widget in ArcGIS Web AppBuilder prompts for credentials.
BUG-000153669	The Search widget in ArcGIS Web AppBuilder only displays results starting with the text written in the search string/field.

### Distributed Collaboration

[Top](#)

BUG-000148663	Custom Web AppBuilder Icons are not displayed in collaboration peer.
BUG-000149225	When sharing a web map that contains a Hosted Feature Layer with related tables in a Distributed Collaboration as copies, the tables are referenced.
BUG-000149716	Distributed Collaboration sync fails when the feature service is referencing a protected default version.
BUG-000150727	Distributed Collaboration workspace table is not showing 10 of 10 results when using Chrome with maximum window.
BUG-000151824	When a guest leaves a distributed collaboration, the configSync job is not deleted and continues to be triggered.
ENH-000148099	Provide the ability to share ArcGIS Experience Builder applications via Distributed Collaboration.

## ArcGIS Enterprise 11.1 Issues Addressed List

ENH-000156828	Improve task result message in the Distributed Collaboration sync status when synchronizeReplica request fails.
---------------	---

### Home Application

[Top](#)

BUG-000132911	The updateAdminAccount REST API endpoint presents the error message, "failed to update admin account ", even though the operation successfully updates the account used to connect to the portal's underlying database.
BUG-000141104	Sign in dialog displays on the Enterprise portal Organization Settings page when the organization is configured to use a public routing utility service that is hosted in another organization.
BUG-000142054	When searching for a member username within a group in the Enterprise portal, results are not returned.
BUG-000143244	When an administrator adds an item from a user to a group, and the item is already shared with another group, the item is not shared to the second group.
BUG-000143828	On the Content tab for a group, the 'Add items to group' button is not available to all group members, despite enabling the setting to allow contributions from all group members.
BUG-000144062	When adding an expression to a filter, the 'in the last' and 'not in the last' operators are not available even if a date field is selected.
BUG-000146846	In ArcGIS Enterprise, the ArcGIS Online geometry service is used, although a custom one is configured.
BUG-000146923	Portal administrators are unable to share private items owned by another user to a group that is also owned by the user.
BUG-000147523	In Portal for ArcGIS, the allowedProxyHosts list cannot contain a space character.
BUG-000149149	Setting virtualDirsSecurityEnabled to 'true' prevents the token or authentication from passing to a new tab in a web browser logged in to a federated ArcGIS Server site.
BUG-000149728	An administrator is unable to find their own username to add themselves to a group in the Enterprise portal when there are multiple users with a similar name.
BUG-000149822	When Integrated Windows Authentication is used for Portal for ArcGIS, the Category Gallery and Portfolio apps return a 401 Unauthorized Error in response to the requests for webapp.manifest and manifest.json respectively.
BUG-000150947	Administrators are unable to share items with groups in which both they and the content owner are members.
BUG-000152788	Cannot assign the ArcGIS StreetMap Premium for ArcGIS Runtime add-on license to named users with an ArcGIS Runtime Lite or Basic license.
BUG-000156824	Solutions and Deep Learning Studio apps do not display in app launcher when opened from the Map Viewer or Instant Apps.
BUG-000156825	Members assigned a custom role with the privilege to share to public but not the organization will encounter an incorrect error when attempting to change the share level to owner.
ENH-000086349	Identify which portal members are no longer domain users.
ENH-000136869	Add capability for Group Managers to add content to their group from the Content page.
ENH-000149196	Allow the ' (apostrophe or single quote) in Category names and consequently also in Filter/Search fields in combination with categories.

## ArcGIS Enterprise 11.1 Issues Addressed List

ENH-000150298	Provide a HTML view of Portal for ArcGIS's System Properties.
ENH-000156826	Add the ability to preview sublayers, tables and fields within a feature layer via the content browsing pages in the Enterprise portal.
ENH-000156827	Add the ability to revert the field settings on a hosted feature layer view to the field settings configured on the source hosted feature layer.
ENH-000156840	Provide a Portal Administration API to return the Portal for ArcGIS version.

### Map Viewer

[Top](#)

BUG-000148609	In the Enterprise portal Map Viewer, the filter query fails with the German filter condition, enthält.
BUG-000148799	When a feature class with default values for a field is shared as a web layer to ArcGIS Enterprise, the default values are not visible in the Map Viewer's editing template
BUG-000149677	The date field is unavailable while filtering a map image layer in the Enterprise portal Map Viewer.
BUG-000152627	The Natural Landscape 1 style in the sketch symbology does not load in the Enterprise portal Map Viewer.
BUG-000156832	Zooming to a Sketch layer in Map Viewer goes to full map extent.
ENH-000156829	Integrate new Arcade editor into Map Viewer.
ENH-000156830	Add ability to configure settings for multidimensional imagery layers in Map Viewer.
ENH-000156831	Support assigning categories when saving a map in Map Viewer.
ENH-000156833	Show Sketch preview in Map Viewer's layer properties.
ENH-000156834	Add ability to soften edges of a heat map.
ENH-000156835	Support discovering and removing utility network traces in Map Viewer.
ENH-000156836	Support additional smart mapping styles for Map Image layers.
ENH-000156837	Support Vector Symbology for Lines and Polygons in Enterprise Portal Map Viewer.
ENH-000156838	Add Charts and Charts and Size renderers in Enterprise Portal Map Viewer.

### Scene Viewer

[Top](#)

BUG-000137930	Scene Viewer fails to display related records in Portal for ArcGIS.
ENH-000146868	For the ESRI Daylight widget, provide an option for daytime slider to use 24:00 hours notation.

## ArcGIS Enterprise 11.1 Issues Addressed List

### ArcGIS GeoEvent Server

[Top](#)

BUG-000124967	The GeoJSON adapter fails while processing massive blocks of data, even though the GeoJSON feature records contain all the required fields.
BUG-000127111	In ArcGIS GeoEvent Server 10.7.1, the Update a Feature output connector allows a reserved PostgreSQL field name (for example, limit) to be used which causes the service publication to fail.
BUG-000133766	When an ArcGIS GeoEvent Server input in a client disconnects and reconnects due to WebSocket inactivity, the GeoEvent Server process leaks thread resources and RAM.
BUG-000133872	When an external server's WebSocket disconnects, the ArcGIS GeoEvent Server input logs an error, but in GeoEvent Manager the input appears to be still running.
BUG-000142170	Configuring multiple GeoTagger Processors on a single input in a GeoEvent Service breaks the ArcGIS GeoEvent Gateway service.
BUG-000145527	ArcGIS GeoEvent Server exposes a used WebServer name/version on an invalid request.
BUG-000153272	After updating to ArcGIS Server 10.9.1 Security 2022 Update 2 Patch, the Site page in ArcGIS GeoEvent Server Manager persistently expires.
BUG-000154054	A spatiotemporal data store export to an Amazon S3 bucket fails with the AmazonServiceException.
BUG-000154271	Entered evaluations are appearing twice on the first observed event record using the GeoTagger Processor.
BUG-000154397	The stream service WHERE clause is not honored for geofence synchronization.
BUG-000154399	The stream service geofence synchronization fails with the 1=1 WHERE clause.
BUG-000154405	The geofence synchronization WHERE clause is ignored when the start and end time extent properties are set.
BUG-000154406	The Choice element does not honor the enter or exit spatial conditions.
ENH-000142598	ArcGIS GeoEvent Server does not ingest non-English characters (for example - Korean language characteres) when an external system is sending JSON data to an input connector and is posted with Content-Type: application/json header.

### ArcGIS Mission

[Top](#)

BUG-000152619	ArcGIS Mission Server fails to start when installed on Red Hat Enterprise Linux (RHEL) or CentOS running in the Federal Information Processing Standard (FIPS) mode.
ENH-000150169	Allow showing the phone number and call-sign of a team member in addition to the profile name and surname.
ENH-000151477	On the Display System - Properties within Mission Server Admin-Interface, show one value per line instead of just one single line, similar to what is done for ArcGIS Server Admin-Interface.
ENH-000151642	Enhance ArcGIS Mission Server 11.0 Admin Directory to include a Change Password option.
ENH-000151749	Enhance ArcGIS Mission Server to remove restricted Password Policy in the utility tools.

## ArcGIS Enterprise 11.1 Issues Addressed List

### ArcGIS Notebook Server

[Top](#)

BUG-000147927	Update the documentation on ArcGIS Notebook Server's system requirements to include the requirement of CPU with Advanced Vector Extensions (AVX) support when using runtimes or images with TensorFlow version above 1.5.
BUG-000153306	The Data Visualization: Construction permits, part 1/2 sample notebook has a typo displaying 'otal' instead of 'total' when the sample notebook is previewed in ArcGIS Notebooks.
BUG-000156794	For web tools created with a title in Japanese, an error "Task name not found in notebook item" is returned.
BUG-000156796	For the Bulgarian locale, invalid characters are displayed on the Configure ArcGIS Notebook Server page.
BUG-000156799	Unable to delete non-empty folders from the workspace directory located at /arcgis/home.
BUG-000156801	The tensorflow-gpu Python library does not recognize GPU devices in an advanced Notebook environment with GPU support.
BUG-000156807	When adding an *.ipynb file as a notebook item, the notebook environment selected on the "New item" dialog is not preserved.
BUG-000156808	Overwriting a notebook web tool from the notebook editor does not update the title or description for the web tool item.
BUG-000156810	Notebook task names that include spaces are not saved correctly.
BUG-000156811	In the "Manage active containers" dialog, notebook container uptime resets to 0 hours after 24 hours.
ENH-000126087	Enable ArcGIS Notebook Server to support configuration with a forward proxy server.
ENH-000156795	Support ArcGIS Notebook Server on Ubuntu 22.04 and Rocky Linux 8 operating systems.
ENH-000156797	Include azure-core and azure-storage-blob Python libraries into ArcGIS Notebook Runtime 8.0.
ENH-000156798	Add support for Windows containers with ArcGIS Notebook Server on Windows Server 2022.
ENH-000156800	Show a progress indicator in the postinstallation utility when installing Notebook container images.
ENH-000156802	Show a progress indicator when Notebooks are opened in the Notebook Editor.
ENH-000156803	Add a "Run web tools" privilege that allows non-notebook users to consume web tools published from Notebooks.
ENH-000156804	On the item details page of Notebook web tools, provide a preview of the notebook used for the web tool.
ENH-000156805	In Notebook Server Manager, provide a status message that updating system properties will result in a restart of the Notebook Server.
ENH-000156806	On the Notebook landing page, stay on the current page after a notebook item is deleted.
ENH-000156809	Allow portal members to create and manage notebook code snippets in the notebook editor.
ENH-000156812	Add support for searching code snippets in the Notebook editor.
ENH-000156813	Provide a user experience for creating and editing webhooks for Notebooks.

# ArcGIS Enterprise 11.1 Issues Addressed List

## ArcGIS Server

### ArcGIS Workflow Manager

[Top](#)

BUG-000144092	An unexpected error message is returned in the ArcGIS Server logs when exporting a file from a job attachment in Workflow Manager.
BUG-000150060	The geoprocessing service step with the Visible At Runtime option checked fails in ArcGIS Workflow Manager with a multiple-machine site setup.
BUG-000151230	Within the ArcGIS Workflow Manager web app, the update extended properties in the Job panel triggers a reloading state, and the refreshing process does not complete.
BUG-000151231	Within the ArcGIS Workflow Manager Server, the Run Pro GP Tool parameters are not saved.

## Azure

[Top](#)

BUG-000152771	Unable to create a multitiered ArcGIS Enterprise 11.0 deployment using Cloud Builder for Microsoft Azure.
BUG-000153178	Unable to add additional ArcGIS Server machine for ArcGIS Enterprise 10.9.1 deployment using Cloud Builder for Microsoft Azure.

## Disaster Recovery

[Top](#)

BUG-000135704	After configuring a backup location to a UNC path, followed by running webgisdr export and import operations, subsequent webgisdr export operations fail to create relational data store backup files.
BUG-000146428	Importing an ArcGIS Server site using the webgisdr tool returns an error related to the app server.
BUG-000150191	Services fail to restore if the SOAP catalog URL cannot be accessed during importSite.
BUG-000150938	The webgisdr tool returns pseudo-localized messages on non-English operating systems.
BUG-000152796	When an ArcGIS Server site import fails while using the webgisdr tool due to BUG-000146428, the site is not returned to a functional state.
BUG-000153213	Discrepancy between execution time and file name after running the webgisdr tool.
BUG-000153494	The webgisdr tool fails for ArcGIS Enterprise 11 with the error message, "Cannot get the Web GIS configuration. Exiting the WebGIS DR utility" if the administrative URL ends with any character in the word 'admin'.
BUG-000154194	Service creation in a single folder can cause failure to create services on high specification machines in an ArcGIS Server site.
BUG-000156961	If any component fails, the exit status of the webgisdr tool is a 0, indicating a successful backup was created.

## ArcGIS Enterprise 11.1 Issues Addressed List

BUG-000156962	When importing a backup to ArcGIS Server, the web server may restart causing the restore operation to fail.
BUG-000156963	Restoring to a different site using webgisdr causes a mismatch in the content directory connection string when using cloud storage.

### Enterprise Geodatabase

[Top](#)

BUG-000135099	Branch versioned data owned by DBO/SDE allows standard portal users access to view and manage all versions via the service.
BUG-000140761	sde.ST_AsText returns a superfluous space after the first parenthesis.
BUG-000142873	After adding an image attachment to a primary Postgres server in ArcGIS Pro, the image does not display when opening the feature class in the secondary Postgres ready-only enterprise geodatabase and the feature class/table is registered as archived.
BUG-000144260	Slow performance when reconciling a branch version in PostgreSQL when using the default work_mem settings.
BUG-000147190	Asynchronous Database Cursors can cause performance impacts on SQL Server keyset cursors.
BUG-000148934	The symbology counts are incorrect when symbolizing an Oracle Enterprise feature service in ArcGIS Pro 2.9.2.
BUG-000150808	Archive difference (DIFF) tables should be created as global temp tables in Azure SQL Databases.
BUG-000150887	Creating an enterprise geodatabase in SAP Hana results in the imv_view_name column in the GDB_Table_registry table only allowing 32 characters.
BUG-000151073	branch version DML statements which use the gdb_ct1 or ct2 index via a scan will be blocked by long running transactions.
BUG-000151341	The Enable Feature Binning tool returns the error 999999 when calculating the sum of a field with large values.
BUG-000151537	Add forceseek index hint to delete statement in the SDE_branch_modified_def_delete procedure.
BUG-000151543	branch versioning procedures, remove NOT EXISTS statements and replace with where rn > 1.
BUG-000151544	sde_branch_tables_modified primary cluster key should be branch_id, edit_moment, registration_id.
BUG-000151589	Create version stored procedure returns the error message: "Invalid syntax near \" while creating and deleting versions from SQL Server using Operating System (OS) Authenticated users for ArcGIS Enterprise geodatabase version 10.7.x or higher.
BUG-000151624	Add maxdop 1 to all branch versioned queries which do not have a spatial or attribute provided query filter.
BUG-000151804	sde_purge_process_information procedure and delete statement can become blocked by uncommitted transactions on sys.objects.
BUG-000151822	Slow performance when viewing utility network associations in an Oracle database.
BUG-000152047	Optimize Oracle branch version spatial query to use DBMS Rowid instead of GDB_ARCHIVE_OID when joining to the analytic subquery.
BUG-000152124	Slow query when expanding associated data in Attributes pane.

## ArcGIS Enterprise 11.1 Issues Addressed List

BUG-000154011	Oracle: When executing multiple updates against the same record in SQL allow tracking edits in the Archive Class ONLY.
BUG-000154805	Some numeric/double type values are rounded when copied/pasted imported into PostgreSQL.
ENH-000148704	Unable to enable enterprise geodatabase on Azure Database for PostgreSQL flexible server.
ENH-000149096	Support/Build ST_Geometry with PostgreSQL version 14.
ENH-000149263	Support OCIStmtPrepare2() for ArcGIS Server with an Oracle database.

### Feature Services

[Top](#)

BUG-000126139	Unable to configure layer-level access control through a server object interceptor (SOI) for utility network layers. When the ArcGIS Server REST handler is configured to disable caching of all layer resources included in a utility network service, the utility network layer becomes inaccessible from ArcGIS Pro.
BUG-000146187	When a feature class in a geodatabase has fields with defined default values, and the user publishes a feature layer, the resulting feature templates in the feature service do not have any default values.
BUG-000153164	The applyEdits operation fails on referenced feature layers with negative values in the field used for the subtype.
BUG-000156842	Replica sync versions should not be able to be deleted when active offline maps still exist.
BUG-000156843	CreateReplica with option to include Utility Network system information may error with "dataset name is invalid" in some cases.
BUG-000157117	Webhooks fail to trigger when attachments are modified using addAttachment, updateAttachment, and deleteAttachments operations.

### GeoAnalytics

[Top](#)

ENH-000134890	Add support to GeoAnalytics Server for configuring a cloud store with an Azure Data Lake Gen2.
ENH-000156007	Add documentation to state that some optimizations are not available through the runpythonscript for GeoAnalytics Server

### Geoprocessing Services

[Top](#)

BUG-000134043	The web tool published from ArcGIS Pro with the 'View output in map image layer' option fails to return an output through ArcGIS Server REST API when the output is set as 'Feature Layer' in the tool.
---------------	---

## ArcGIS Enterprise 11.1 Issues Addressed List

BUG-000137332	The custom Python environment configuration for a geoprocessing service is not respected, and the default Python environment is used instead.
BUG-000145220	An ArcPy toolbox script with out-of-ASCII-range unicode characters fails to publish to ArcGIS Enterprise.
BUG-000147411	The embedded file path in the geoprocessing tool is corrupted after publishing to ArcGIS Server 10.9.1 as referenced, and the error message, "SyntaxError: EOL while scanning string literal" is returned.
BUG-000149899	Misleading analyzer error message and behavior publishing a geoprocessing service when the parameters are different between client and server.
BUG-000150063	Geoprocessing services published from ArcGIS Pro with raster input and the output, show a blank page for the "Job Result Map Service" due to missing results.msd
BUG-000150924	Overwriting an existing geoprocessing service does not show the configured values of the service.
ENH-000142399	Provide the option for "Feature Service Output" in the CreateGPSSDDraft ArcPy function.

### GIS Server

[Top](#)

BUG-000128912	The usage report from ArcGIS Server Statistics does not generate an accurate result if instances in use reach the maximum number of instances under the ServiceRunningInstancesMax metric.
BUG-000144639	Allowing any option under the administrative privilege (for example, manage license, assign member) to a custom role grants privileges to view all the hosted content from the ArcGIS Server REST endpoint even when the privilege to view all content is not granted.
BUG-000147017	Usage statistics are not captured for a hosted feature layer in ArcGIS Enterprise.
BUG-000156823	When a custom role has an administrative privilege and a publisher privilege, but not "Publish server-based layers" and "Publish web tools" privileges, a user with this role can erroneously publish server-based layers and geoprocessing service from ArcGIS Server Manager.
BUG-000156960	The operational health script fails when a graph store or spatiotemporal data store is registered.
ENH-000128336	Provide the ability to restrict users from registering data with ArcGIS Server without restricting publishing capability.
ENH-000156822	During an ArcGIS Server upgrade, create a report of services that were automatically migrated from ArcMap Runtime to ArcGIS Pro Runtime.

### High Availability

[Top](#)

BUG-000156964	Join site fails if the primary machine is using a non-default Web Server certificate.
---------------	---

## ArcGIS Enterprise 11.1 Issues Addressed List

### Linux

[Top](#)

BUG-000141964	The link containing the typographical error, "ttps://gisupdates.esri.com/QFE/S-1081-P-653/ArcGIS-1081-S-ALPI-Patch.msp" appears four times in https://downloads.esri.com/patch_notification/patches.json called by the patchnotification utility.
BUG-000152724	The ArcGIS Notebook Server patch notification tool does not identify available patches.
BUG-000156814	ArcGIS Server stops working if the fontcache directory grows and runs out of inodes.
BUG-000156815	Publishing a scene service by referencing a data folder fails when sharing a multi-patch scene layer to Linux portals.

### Manager

[Top](#)

BUG-000151140	When the Firefox display language is configured to Spanish (Argentina), Server Manager mistakenly displays in Arabic.
BUG-000151470	When the machine name for ArcGIS Server contains many characters, the Job Information panel does not display.

### Publishing

[Top](#)

BUG-000147992	Bulk publishing to a user-managed data store within the ArcGIS Enterprise Portal does not pick up the time zone from the referenced database.
BUG-000151485	Uploading a CSV as a file and publishing it as a table in Portal for ArcGIS creates a spatial feature layer if the table includes a string field with a leading number and a letter.
BUG-000154986	Creating hosting services with GeoJSON returns the error, "ERROR 160277" when the first text field length is shorter than the text field of the next records.

### Security

[Top](#)

BUG-000124869	The default self-signed certificate cannot be deleted, even if it is not designated as the web server SSL certificate.
BUG-000150662	The default self-signed certificate cannot be deleted, even if it is not designated as the web server SSL certificate.
ENH-000142424	For OpenID Connect configurations, support the use of a customer defined attribute for the account username.

## ArcGIS Enterprise 11.1 Issues Addressed List

ENH-000149955	When only OpenID Connect logins are enabled, automatically redirect from the ArcGIS Sign in page to the OpenID Connect provider's login page.
ENH-000156845	For SAML logins, enable signed requests and encrypted assertions by default.

### ArcGIS Web Adaptor

[Top](#)

BUG-000153146	Path traversal attack vulnerability in ArcGIS Server Web Adaptor.
ENH-000156816	Enhance the ArcGIS Web Adaptor (IIS) Windows to take advantage of .NET 6.0 Framework.

### Documentation

[Top](#)

BUG-000141615	Include information on setting the ARCGISHOME variable when configuring Python 3 runtime for ArcGIS Server on Linux in our documentation.
BUG-000144048	Update the Distributed Collaboration FAQ to indicate that Esri System owned content will not be shared through a collaboration.
BUG-000150868	Drawing issues with hosted feature services in ArcGIS Enterprise when the basemap uses WGS84, but the feature service uses a transformation missing from the hosting server.
BUG-000151344	The ArcGIS REST API reference documentation for virtualDirsSecurityEnabled does not convey a clear application of use.
BUG-000153371	The 'Data sources for ArcGIS Server' documentation states that the publisher and site referencing different folders scenario must not be used when publishing to a federated server from ArcGIS Pro.

### Installations and Upgrades

[Top](#)

BUG-000127216	The Portal for ArcGIS 10.7.1 upgrade fails at the Continue Upgrade stage if the Navigator Maps group owner is changed prior to the upgrade.
BUG-000152888	Error, "Upgrade failed. Failed to update configuration settings" upon upgrading the Portal for ArcGIS.
BUG-000156821	When extracting content during a Portal for ArcGIS upgrade, the process can fail due to the presence of the Thumbs.db files in the Portal for ArcGIS content.
