Installation and Upgrades

ArcGIS Enterprise 11.4 Issues Addressed List

ArcGIS Data Store

Top

BUG-000169801	The geodatabase version is not updated when the relational data store is upgraded from ArcGIS Enterprise version 10.8.
BUG-000171861	Index prefix is not updated in the metadata index during the upgrade of the spatiotemporal big data store.
ENH-000147259	Add a command line utility to perform full vacuum.
ENH-000148579	Add support for HTTP Strict Transport Security (HSTS) headers in ArcGIS Data Store.

ArcGIS Enterprise Portal

Analysis

Top

BUG-000167687	The Trace Downstream analysis tool does not draw the correct downstream length as specified in the tool.
BUG-000171860	Spatial statistics tools fail when using a restricted field name as an analysis field.

ArcGIS Dashboards

Top

BUG-000139738	ArcGIS Dashboards elements fail to render and return a data source error when the nested table in the map service is chosen as a standalone layer.
BUG-000161822	The Legend of the Serial Chart widget in ArcGIS Dashboards app does not follow the opacity settings.
BUG-000163904	ArcGIS Dashboards with a custom vector tile basemap uses the ArcGIS Online geometry service despite the custom geometry service being configured in the organization's 'Utility services' settings.
BUG-000165998	The Arcade data expression in ArcGIS Dashboards fails when using a 'date only' field type.
BUG-000169899	The hyperlink for the first item in the ArcGIS Dashboard list is not selectable when the Filter action is present.
ENH-000134859	Allow changing selectors' colors in ArcGIS Dashboards.
ENH-000166205	Allow the use of aria-label and aria-hidden HTML attributes in ArcGIS Dashboards.
ENH-000167212	Allow the Serial Chart to display January instead of the year value in ArcGIS Dashboards.

ArcGIS Enterprise 11.4 Issues Addressed List

ArcGIS Experience Builder

BUG-000129394	Related records on a hosted feature layer or an ArcGIS Server service fail to load in ArcGIS Experience Builder.
BUG-000141894	The Embed widget does not allow users to embed public or secure web apps or ArcGIS Dashboards from within the user's organization.
BUG-000143013	In the web experience, the Next button is disabled when the List widget is sorted.
BUG-000144349	The Filter Widget does not support ImageryLayer as Filter Widget.
BUG-000145821	The Search widget in ArcGIS Experience Builder does not display the location using 'Use current location' when the locator uses a spatial reference other than WGS.
BUG-000146312	Widgets configured to open on loading, open above a splash screen in ArcGIS Experience Builder.
BUG-000149045	The Survey widget in ArcGIS Experience Builder does not honor the Cache answer settings of the survey.
BUG-000154242	ArcGIS Experience Builder queries null values as strings, causing issues when querying a GlobalID field through the Record Selection Changes trigger or the Select Data Records action.
BUG-000155158	Result Record Count causes the query to not display results when utilizing the Select tool in ArcGIS Experience Builder with a large dataset.
BUG-000156893	Unable to configure ArcGIS Experience Builder Developer Edition 1.10 with Node.js version 17.4.0.
BUG-000157730	In ArcGIS Experience Builder, the layer's label configuration and the order of the layers in the Edit widget are not reflected in the widget.
BUG-000159814	Choosing Pill selector as input style in the SQL Expression Builder of the filter widget results in freezing of the opened Experience.
BUG-000160294	When using the Utility Network Trace widget, a starting point or barrier cannot be added if the selection tool is active.
BUG-000160538	In ArcGIS Enterprise, a CSV file cannot be exported from a web app embedded in an ArcGIS Experience Builder.
BUG-000161292	In ArcGIS Experience Builder, a pie chart does not update if the 'View for empty selection' option is enabled.
BUG-000161742	The bookmarks in the Map widgets with the 3D scenes do not honor the ground layers in ArcGIS Experience Builder.
BUG-000162098	Creating multiple data views for a data layer in ArcGIS Experience Builder prevents it from being used as a filter source in the Table widget.
BUG-000162728	When a Map Widget is scrollable, the tools enabled on the widget cannot be selected.
BUG-000162797	The configured view for an empty selection returns the "No data found." warning message in the Chart widget when 'Category type' is 'By group' in ArcGIS Experience Builder.
BUG-000162845	Special characters as capitals are not distinguished in the Button widget in ArcGIS Experience Builder.
BUG-000162854	Unable to use data added from the computer using the Add Data widget in the Analysis widget within ArcGIS Experience Builder.
BUG-000163843	In ArcGIS Experience Builder, Export to CSV from the Query widget offers two different separators in the Dutch language.

ArcGIS Enterprise 11.4 Issues Addressed List

BUG-000164137	An error is returned while running the 'npm install –offline' command in the client folder of ArcGIS Experience Builder developer edition version 1.13.
BUG-000164150	Adding a KML file through the Add Data widget returns the error "The file cannot be successfully uploaded."
BUG-000164315	The 'Filter data records' action, when a record selection changes in ArcGIS Experience Builder widgets, does not filter when selecting records outputted from a query on a date field.
BUG-000164607	An error is returned when adding a GeoJSON file using the Add Data widget.
BUG-000164617	After editing the first feature with the Edit widget in ArcGIS Experience Builder, the next selected features are in editing mode even if the Edit widget is closed.
BUG-000164851	Fullscreen mode cannot be switched off for a device with a small screen.
BUG-000164939	The configuration page for certain widgets in ArcGIS Experience Builder Foldable templates is not available when viewed from the sidebar while editing the application.
BUG-000165002	In the List widget, there is no scroll bar for the data views, so when adding many views, eventually the '+ Create a view' button is cut off at the bottom extent of the browser's display.
BUG-000165085	Portal for ArcGIS members with a non-English profile language are unable to view the ArcGIS Experience Builder Basemap Gallery widget in ArcGIS Enterprise on Kubernetes.
BUG-000165227	When using the Search widget in ArcGIS Experience Builder and searching by layer, if the search term begins with a single character and a space before the rest of the search term, results are not returned unless the Enter key is pressed.
BUG-000165570	When the Query widget is set to 'Export On', the widget performs inconsistently in ArcGIS Experience Builder.
BUG-000165699	In ArcGIS Experience Builder, adding a KML or GeoJSON file through the Add Data widget fails and the following error message, "The file cannot be successfully uploaded." is returned.
BUG-000165852	When selecting a new ArcGIS Experience Builder query within the Query widget builder, the attribute filter's label and description do not update to the newly selected query.
BUG-000165896	The Bookmark widget in ArcGIS Experience Builder does not honor the time setting in individual bookmarks on the web map.
BUG-000165981	Configuring the Search widget with a layer source from a map in ArcGIS Experience Builder creates field indexes with '-' in the name that will cause SQLite replicas to fail for the feature layer.
BUG-000166033	Switching bookmarks using the Bookmarks widget removes the basemap when adding the Scene Viewer in ArcGIS Experience Builder.
BUG-000166213	The Edit widget continues to load even after selecting and editing features in ArcGIS Experience Builder with a filter applied to it.
BUG-000166256	The Description field of the Bookmark widget in ArcGIS Experience Builder does not allow the user to enter spaces.
BUG-000166475	Using a custom Data Extract tool from ArcGIS Enterprise, and exporting from the Analysis widget fails and the error message "e.fetcFolders is not a function" is returned in a public ArcGIS Experience Builder app.
BUG-000166868	The extent URL parameter in the ArcGIS Experience Builder Map widget does not work as explained in the related documentation.
BUG-000166869	Unable to embed HTML code with the Embed widget in ArcGIS Experience Builder with a public account.
BUG-000166968	The action trigger fails to filter the data in the ArcGIS Experience Builder Map widget when the field contains single quotation marks.
BUG-000167056	The Edit widget in ArcGIS Experience Builder continues to load even after editing the feature with the Filter widget turned on.

ArcGIS Enterprise 11.4 Issues Addressed List

BUG-000167157	Results are not listed in the details section of the History tab in the Analysis widget in ArcGIS Experience Builder after Extract Data is run.
BUG-000167284	The selection of scene layer points in the Map widget does not select an associated feature layer record in the Table widget.
BUG-000167332	The Suitability Modeler widget is not properly reclassifying the measurement scale based on the assigned percentage influence.
BUG-000167362	Querying using the Query Widget spatial filter does not display results for the first query in ArcGIS Experience Builder.
BUG-000167426	The feature selection highlight outline does not line up correctly in ArcGIS Experience Builder Developer Edition 1.14 when using Spatial Reference 2927.
BUG-000167621	The List widget in ArcGIS Experience Builder does not export the correct number of features when custom parameters are set in the web map, it exports all features.
BUG-000167997	When connecting two or more feature layers as data sources for the Search widget in ArcGIS Experience Builder, the 'Zoom to' action only functions on one layer.
BUG-000168037	Unable to type in the search box for the Query widget in ArcGIS Experience Builder on a mobile device as the keyboard is not showing up when not pulling the widget all the way up.
BUG-000168664	When using the Ctrl + P shortcut to print the page in ArcGIS Experience Builder, the page shows a transparent overlay in the print preview and output.
BUG-000168729	Unable to edit ArcGIS Experience Builder owned by another user, despite having sufficient privileges.
BUG-000168730	Related records are displayed in Edit widget in ArcGIS Experience Builder even when Related records option is disabled for a layer with multiple related tables
BUG-000168849	ArcGIS Experience Builder experiences are unable to be interacted with upon initial load when embedded in an external website using an HTML iframe
BUG-000168969	Line layers added to nested groups in a Web Map are not available for selection in the Elevation Profile widget under Customize Settings in ArcGIS Experience Builder.
BUG-000169034	The query widget results layer name is displayed in a feature's pop up in ArcGIS Experience Builder when the widget is configured with a Zoom to action.
BUG-000169049	The Bookmarks widget does not honor the 'Daylight' or 'Weather' settings in ArcGIS Experience Builder.
BUG-000169054	Data views in ArcGIS Experience Builder List widget return a limited amount of records depending on widget's size.
BUG-000169166	The ArcGIS Experience Builder Search widget does not return the expected results when searching for the display name of integer field values with coded domain settings.
BUG-000170269	When using referenced map services in ArcGIS Experience Builder, configuring the List widget with sorted data leads to severe errors in the ArcGIS Server logs.
BUG-000170293	ArcGIS Experience Builder performs automatic queries upon load, resulting in timeouts and app crashes for large datasets.
ENH-000134433	Provide ability to track ArcGIS Experience Builder's Performance with Google Analytics.
ENH-000134701	Allow the ability to customize feature popups when a feature is selected on the map.
ENH-000136782	Add Track widget or tool to ArcGIS Experience Builder.
ENH-000137926	Provide Cookie banner options for users in ArcGIS Experience Builder applications to meet General Data Protection Regulation guidelines.
ENH-000141346	Provide the ability to configure the default measurement units of the Measure tool that is a part of ArcGIS Experience Builder (developer edition)'s Map widget.
ENH-000143692	Allow image services to be supported as a data source in ArcGIS Experience Builder.

ArcGIS Enterprise 11.4 Issues Addressed List

ENH-000147796	Provide the ability to show related table records in the List widget right after selecting a feature from the feature class.
ENH-000153737	Allow support for image services in the Timeline widget in ArcGIS Experience Builder.
ENH-000155027	Add the ability for the Widget controller to automatically load the widgets when switching between views.
ENH-000155640	Allow the Legend to be configured such that the layers and features in the legend update dynamically based on their visibility on the map in ArcGIS Experience Builder Developer Edition.
ENH-000156397	Provide the ability to dock popups by default in the ArcGIS Experience Builder Map widget.
ENH-000156997	When searching the web map for a feature in ArcGIS Experience Builder, the pop-up window appears although pop-ups are disabled.
ENH-000157269	Provide the Building Explorer Tool in ArcGIS Experience Builder.
ENH-000158305	Enhance the Web App Table widget with the capabilities provided in the ArcGIS Web AppBuilder Attribute Table Widget.
ENH-000158687	Provide the tools in Map widget as standalone widgets in ArcGIS Experience Builder Developer Edition.
ENH-000159699	Include the extent indicator box in the map widget of ArcGIS Experience Builder.
ENH-000161431	Enhance support for using relational databases in ArcGIS Experience Builder.
ENH-000161895	Add the ability to reorder the bookmarks in the Bookmark Widget in ArcGIS Experience Builder.
ENH-000162102	Provide support to select all or desired results from the ArcGIS Experience Builder Query widget output to be used for further analysis by other widgets.
ENH-000164540	Support option to alphabetically sort contents in Add Data widget ArcGIS Experience Builder.
ENH-000164805	Provide a "Set Filter" option for the Table widget in ArcGIS Experience Builder.
ENH-000165404	Update documentation to highlight the hardware requirements for ArcGIS Experience Builder.
ENH-000167956	Include the ability to enable snapping within the Measurement Tool in ArcGIS Experience Builder Developer Edition.
ENH-000168674	Enable support for subtype group layers as a data source in ArcGIS Experience Builder widgets.

Distributed Collaboration

[Top](#)

BUG-000143028	Unable to share feature layers by reference when the size is greater than 1GB.
BUG-000153500	The distributed collaboration sync fails with Unable to publish item. Request made to publish item as new service but the item already exists
BUG-000165350	Distributed collaboration does not sync item description changes from ArcGIS Online to ArcGIS Enterprise.
BUG-000167652	The Last Modified timestamp of a hosted feature layer participating in a distributed collaboration is updated upon every workspace synchronization, regardless of any changes to the source item.
BUG-000167743	Update the item URL when sharing an ArcGIS Experience Builder web application from ArcGIS Enterprise to ArcGIS Online through a distributed collaboration.
BUG-000167766	Distributed collaborations between ArcGIS Enterprise and ArcGIS Online organizations in the Asia-Pacific region fail to synchronize more than 20 items.

ArcGIS Enterprise 11.4 Issues Addressed List

Home Application

BUG-000153590	In ArcGIS Enterprise, block administrators from adding groups or member categories to new member defaults when default user type and role are not set.
BUG-000156272	Lightweight Directory Access Protocol (LDAP) user accounts with spaces in the username are unable to be added as members to the Portal.
BUG-000163559	When adding a scene layer from ArcGIS Online as an item from a URL to Portal for ArcGIS, the item details page fails to load.
BUG-000165873	When editing a folder name on the Content page the 'home' and 'end' keyboard buttons skip the mouse cursor to the beginning and end of the folder list, instead of the folder name.
BUG-000166297	Disallow custom administrators from creating new folders for other members when changing ownership of content.
BUG-000168528	Using Google Chrome or Microsoft Edge 126 to access ArcGIS Enterprise 'Groups' or 'Gallery' pages results in "STATUS_ACCESS_VIOLATION" errors thrown in the browser.
BUG-000168801	Control editing access settings with the referenced feature layer are not respected in Portal for ArcGIS.
BUG-000170004	When sharing an Esri basemap to a group when the language is set to German and the number/date format is set to Austrian the share basemaps does not action.
BUG-000171258	Anonymous users are unable to access ArcGIS Enterprise when automatic account creation is turned off for environments configured with web tier authentication.
BUG-000171259	Administrators are unable to change the owner of a CSV table to a user assigned the Publisher or User role in ArcGIS Enterprise.
BUG-000171877	When an administrator or user with privileges to create administrative reports attempts to generate item and member reports, the generated report will be incorrectly titled when using the default title.
BUG-000171878	Do not show the 'join group' option on the group preview panel for members without the privilege to join organizational groups.
BUG-000171879	Updates to the dependent privileges required to support the administrative privilege to delete members.
BUG-000171886	Provide the ability to Enable and Disable Editor Tracking on a knowledge graph service.
ENH-000171846	For imagery layers, allow enabling server object extensions (SOEs) and server object interceptors (SOIs) on services from the item details page.
ENH-000171847	Allow administrators and owners of imagery layers to configure a layer's settings, and stop and start the imagery service.
ENH-000171848	Allow administrators and owners of geocode layers to configure a layer's properties, and start and stop the geocode service.
ENH-000171849	In the layer's Settings tab, allow the Advanced Options to be expanded and collapsed.
ENH-000171880	Support a user experience for exporting and importing group content.
ENH-000171881	Provide the ability deploy the current version of ArcGIS Living Atlas content.
ENH-000171882	Support the ability to assign Portal items with Classification and Dissemination Markings.
ENH-000171883	Support the ability to configure a new routing service called Snap to Roads (Beta) using a network dataset in mobile geodatabase.
ENH-000171884	When a custom data provider has been registered with the organization, support the ability to publish a feature layer that references the data provider.

ENH-000171885	Introduce a task scheduler for Map and Feature Service cloud data warehouse (CDW) snapshots.

Map Viewer

BUG-000146151	When Window Authentication is enabled, viewing a KML layer in Map Viewer returns the error message, "The KML, is not available or cannot be added to the map."
BUG-000151530	Unable to add attribute expression in the pop-up configuration of a standalone table published as a map image layer.
BUG-000152063	The filter added to the hosted feature layer view created from the Location Tracking extension is not respecting its functionality in Map Viewer.
BUG-000152181	When the Show option is clicked in a related attribute table in Portal for ArcGIS Map Viewer Classic, the attributes of the related layer are not displayed if the relationship class is created using long integer, short integer, and float data types.
BUG-000159168	Unable to retain the visibility settings of layers in Portal for ArcGIS Map Viewer when saving the map twice.
BUG-000167377	Unable to apply filters to the referenced map service using the Date field in the web map in ArcGIS Enterprise 11.2 when the map service is opened directly in Map Viewer.
BUG-000169870	In the Map Viewer, pre-existing attributes are displayed as empty in the filter list if they are not in the domain list.
BUG-000171773	Unable to use heat map symbology on a map image layer in Map Viewer.
ENH-000116013	Provide ability to filter field by a user-specified time frame to include both date and time for hosted feature services in Portal for ArcGIS.
ENH-000120713	Add the "In the last" time filters to non-hosted services.
ENH-000128137	For feature layer labelling, allow a popup to open when clicking on labels for feature layers.
ENH-000130376	Add the ability to support more label placement options for FeatureLayer Polylines.
ENH-000171887	Provide ability to view related records in feature table.
ENH-000171888	Add support for browsing related records with Map Image Layers.
ENH-000171889	Provide ability to add layer from file in Map Viewer.
ENH-000171890	Provide ability to open a table from a pop-up for viewing specific records.
ENH-000171892	Add support for catalog layer in Map Viewer.
ENH-000171893	Provide ability to add and delete fields in Map Viewer.
ENH-000171894	Provide the ability to calculate fields in feature table.

Portal Framework

BUG-000161784	Groups page in ArcGIS Portal Administrator API returns an incorrect number of groups.
BUG-000169064	The USA Current Wildfires ArcGIS Living Atlas Live Feeds layer is not available in ArcGIS Enterprise.

ArcGIS Enterprise 11.4 Issues Addressed List

ENH-000118064	Provide an ability to migrate an ArcGIS Enterprise environment from one domain to another domain, to update the URLs of their existing deployment easily.
ENH-000131675	Allow Portal for ArcGIS to update the appropriate URI's after a DNS alias or reverse proxy is configured after federation.
ENH-000136390	If the server.xml file becomes malformed or empty, provide support to recover the file during startup of ArcGIS Enterprise.
ENH-000171895	Use audit logs to monitor user activity and changes to the system.
ENH-000171897	When querying log messages from the Portal Administrator Directory, include server logs by selecting one or all federated servers to allow access to all logs.
ENH-000171898	Provide prevention and recovery mechanisms for critical files in ArcGIS Enterprise.

Scene Viewer

Top

BUG-000164657	When building an attribute expression for pop-ups of any layer in Scene Viewer, no list of available profile variables is provided through the '(x) --> $map' expression, as is the case in Map Viewer.
ENH-000106971	Provide the ability to set the feature elevation to an attribute or to use it to describe the offset from the ground in a variety of units of measurement.

Templates

Top

BUG-000171000	Remove hard coded URLs that reference arcgis.com from Instant Apps so they can work in fully disconnected ArcGIS Enterprise deployments.
BUG-000171859	Instant Apps templates missing from home page in fully disconnected ArcGIS Enterprise deployments that have external content disabled.

Webhooks

Top

BUG-000169990	When a deactivated webhook is reactivated, the system ignores the webhook's deactivation policy.
ENH-000169992	When a webhook fails or deactivates, generate log messages at the warning level instead of info.

ArcGIS Enterprise 11.4 Issues Addressed List

ArcGIS GeoEvent Server

BUG-000171659	Failure to export data from the spatiotemporal big data store to Amazon S3 or Azure Blob Store through GeoEvent Manager.
BUG-000171663	Stream services published from GeoEvent Server assign a GUID as the track identifier field when a TRACK_ID tag isn't specified as part of a GeoEvent Definition schema.

ArcGIS Notebook Server

BUG-000171902	When a notebook containing Python code that creates map widgets using the ArcGIS API for Python is run via scheduled tasks or the ExecuteNotebook API, the Web Map as JSON of the widgets is written to the ipynb metadata which can cause the notebook size to increase rapidly.
ENH-000171903	Provide the ability to manage files in the user workspace from the ArcGIS Notebooks home page.
ENH-000171904	Update ArcGIS Notebooks to JupyterLab-based Notebook experience (Jupyter Notebook version 7.2.1).
ENH-000171906	In ArcGIS Notebook Runtime version 11.0, include ArcGIS API for Python 2.4.0, which includes such features as an updated map widget and a new Service class.
ENH-000171907	Provide ArcGIS Notebook Server samples data without a separate installation.
ENH-000171908	Provide the ability to configure the maximum running time for individual notebook web tools.

ArcGIS Server

ArcGIS Workflow Manager

BUG- 000169950	Unchecking the visibility of an Update Job Properties step when the table or field is set to 'Date' and the Arcade expression is 'Date()' causes jobs to fail in ArcGIS Workflow Manager 11.3.
BUG-000169022	Performance issue as the number of jobs keeps growing in ArcGIS Workflow Manager.
BUG-000169133	Dates in shared searches of ArcGIS Workflow Manager do not honor the date format set in the portal of user language settings.

ArcGIS Enterprise 11.4 Issues Addressed List

Disaster Recovery

BUG-000168556	If the WebGISDR tool backup is in Amazon S3, downloading it during a restore may never complete.
BUG-000169257	The WebGISDR tool does not backup files larger than 5 GB when the Portal for ArcGIS content and backup locations are in Amazon S3.
BUG-000170223	In ArcGIS Enterprise 11.3, the import of a portal webgisdr backup fails with the error "The incoming site bundle is invalid" if a federated ArcGIS Server 10.9.1 is included.
BUG-000170382	When restoring incremental webgisdr backups on ArcGIS Enterprise 11.2, server processes are not properly terminated.
BUG-000171379	Concurrent cleanup of async jobs may cause import site for ArcGIS Server to fail.
BUG-000171380	If importSite fails, there is a chance that the temporary extracted files for the backup are not cleaned up.

Enterprise Geodatabase

BUG-000128414	The Delete Schema Geodatabase tool fails with the error message, "ERROR 999999: Error executing function. DBMS table not found. Failed to execute (DeleteSchemaGeodatabase)."
BUG-000161212	The spatial filter applied when querying a feature service that references the SDO geometry data in Oracle Database 19c fails with the error message code 400, "Unable to complete Operation" with an extended code of 2147216072.
BUG-000163487	The Create Database User tool fails on SAP HANA databases in ArcGIS Pro 3.2 and ArcGIS Pro 3.3.
BUG-000166688	Running the Migrate Object ID To 64 Bit tool can recreate the branch versioned class indexes incorrectly.
BUG-000166934	SDESPATIALINDEXHINT is no longer working for paginated queries.
BUG-000167887	The GetFeature operation on a WFS service referencing data from a SQL Server Enterprise Geodatabase fails to return any results unless the count parameter is included in the request after installing the ArcGIS Server Branch Versioning Data Consistency Patch.
BUG-000168048	Copying feature classes to a Db2 enterprise geodatabase, three duplicate feature classes are created when Db2 Text search extender is not enabled.
BUG-000168781	Fix memory leak when executing SQL using OCI.
BUG-000169138	A constraint violation error can occur if a feature is edited multiple times and the version is saved before posting.
BUG-000169238	Upgrade enterprise geodatabase fails on SQL Server when colregistry_fk is missing.
BUG-000169442	Support the SAP HANA Cloud application lock API within the branch versioning transaction model.
BUG-000170589	High memory utilization by the SAP HANA service when serving large numbers of spatial query requests.

ArcGIS Enterprise 11.4 Issues Addressed List

Feature Services

BUG-000145809	Editing a branch versioned feature layer with attachments enabled fails and returns the following error message, "FIDs must not be negative."
BUG-000160276	Canceling the sync request to a traditional versioned referenced feature layer can result in the corruption of the replica, which then fails to sync on subsequent attempts.
BUG-000171805	In a stand-alone ArcGIS Server deployment, custom data feeds for feature services cannot be secured.
BUG-000171900	With f=pbf, feature service query results are returning features even when exceededTransferLimit is set to true.

Geoprocessing Services

BUG-000161509	Geoprocessing tools published from ArcGIS Pro do not honor the maximum number of records returned by the server for the result map image layer.
BUG-000161978	The 'GPStringHidden' datatype keyword in a Python script tool parameter changes to 'GPString' after publishing the geoprocessing service to ArcGIS Enterprise.
BUG-000166397	Allow users to preserve original geometry without the automatic simplifying of features when using geoprocessing services through the REST API.
BUG-000166592	The Export Map operation fails to draw any features when using a result map service from a geoprocessing service job in a multi-machine ArcGIS Server site.
BUG-000167171	Arcpy.management.GetCount does not work (Tool is not licensed) with an ArcGIS Server Basic license. With ArcGIS GIS Server Standard the tool works.

GIS Server

BUG-000159194	When querying the server logs, the response times for REST query requests are not populated in the payload under elapsed, rather it is populated as part of the log message.
BUG-000166464	ArcGIS Server will ignore invalid layer IDs in REST URLs even for downloads.
BUG-000166469	ArcGIS Server returns user supplied elements in JSON error responses.
BUG-000167757	Downloading PDF attachments larger than 5 MB fails when ArcGIS Server is installed on Linux.
BUG-000168963	Database connection strings inside of ArcGIS Server's dsconnections.lst files may become damaged when validating data store connections in ArcGIS Server.
ENH-000131676	Allow ArcGIS Server to update the appropriate URl's after a DNS alias or reverse proxy is configured with the Portal for ArcGIS that it is federated with.
ENH-000137368	Provide a real-time status of ArcGIS Server's post-upgrade operation.

ArcGIS Enterprise 11.4 Issues Addressed List

High Availability

BUG-000170350	Running the reconfigureIndex operation in a highly available portal will corrupt the index service.

Publishing

BUG-000126662	Unable to publish GeoJSON files to Portal for ArcGIS as a hosted feature layer without explicitly setting the spatialReference field, when the same GeoJSON file can be published as a hosted feature layer in ArcGIS Online.
BUG-000141864	Exporting a CSV file with a comma as a decimal symbol from a hosted feature layer shows a point as a decimal symbol instead of a comma symbol when the machine's region and language are set to the Netherlands.
BUG-000142389	Unable to view data in the MGRS coordinate system when a CSV file is added as an item to Portal for ArcGIS.
BUG-000146540	Chinese characters are returned in the layer names while bulk publishing the data from a user-managed data store in the ArcGIS Enterprise portal.
BUG-000165042	Feature layers created after bulk publishing from a PostgreSQL non-geodatabase data store are not accessible and do not display in Map Viewer.

Scene Services

ENH-000171856	Store scene layer caches in object store instead of in the tile cache data store.
ENH-000171857	Provide a tool to migrate scene layer caches from the deprecated tile cache data store to the object store.
ENH-000171858	Add support for 3D tiles layers.

Security

BUG-000131233	Adding Active Directory (AD) members from a file within Portal for ArcGIS with a duplicate username does not return the error message, "Multiple instances of the same username detected", and the compile member list continues to load after adding the file.
BUG-000146151	When Window Authentication is enabled, viewing a KML layer in Map Viewer returns the error message, "The KML, is not available or cannot be added to the map."
BUG-000146343	Update admin API to check for certificate and cipher suite compatibility when changes are made to either the certificate alias or the supported cipher suites.
BUG-000171853	Unable to add Active Directory or LDAP users with special characters in the username through the Home application.

ArcGIS Enterprise 11.4 Issues Addressed List

ENH-000148579	Add support for HTTP Strict Transport Security (HSTS) headers in ArcGIS Data Store.
ENH-000171850	Allow administrators to customize username values when manually adding OpenID Connect (OIDC) accounts.
ENH-000171851	Update Portal for ArcGIS security scan script to provide suggestions for allowedProxyHosts.
ENH-000171852	Add support for defining a Content-Security-Policy header in Portal for ArcGIS for embedded web applications.
ENH-000171854	Add support for CHACHA cipher suites in Portal for ArcGIS.
ENH-000171855	Add support for CHACHA cipher suites in ArcGIS Server.

ArcGIS Web Adaptor

[Top](#)

BUG-000168094	When ArcGIS Server is deployed as a stand-alone system with client-certificate authentication, it fails when configured with Windows users and roles.
ENH-000171909	Enhance the ArcGIS Web Adaptor IIS to support ArcGIS Monitor.
ENH-000171910	Enhance the ArcGIS Web Adaptor Java to support ArcGIS Monitor.

Documentation

[Top](#)

BUG-000166465	The documentation for configuring SAML authentication does not indicate that the setting to update profiles on sign in includes updating users' full names.
BUG-000169761	The documentation for secure ArcGIS Server communication does not indicate that both TLS 1.2 and 1.3 are supported by default.
BUG-000170864	Add port 11211 to the ports used by Portal, Data Store, Workflow Manager topics.

Installations and Upgrades

[Top](#)

BUG-000167282	Esri curated content is missing after upgrading Portal for ArcGIS.
