Introducing THE NEW STANDARD FOR GIS
ArcInfo 8

Immediately Usable
Complete out-of-the-box applications make ArcInfo easy to learn and immediately usable.

Great Performance
Perform complex analysis as well as visualization and queries with unprecedented speed.

Interoperable
Directly read, use, and output all popular formats.
• CAD
• Image
• Raster
• SQL
• Vector

All-Relational and Open Data Management
Use any standard DBMSs to store, manage, and version GIS data.
• Oracle®
• SQL Server™
• DB2®
• Informix®
• Microsoft® Access
• Sybase®

Integrated Editing
CAD-like editing tools make editing easy and productive with accurate database updates in record time.

Enhanced Spatial Data Model
• Topology
• Integrated parametric geometry
• Behavior
• Rules
• Attributes
• Annotation
• Complex user-defined features

Versioning
• Manage multi user edits
• Model design alternatives
• Built-in conflict resolution
• Full network modeling between versions

Modern User Interface
• Drag and drop
• Dockable toolbars
• Cut and paste
• Windows® compliant

Integrated Business and Scientific Charting
• Pie, bar, 3-D, scatter, and line charts
• Cut and paste into other documents
• Overlay trend analysis

Smart Data
Store rules and behavior with your data for intelligent analysis.

CASE Tools
Use standard CASE technology for data modeling.

Advanced Geoprocessing
• Geostatistical analysis
• Advanced cartography
• Overlay processing
• Proximity analysis
• Over 1,000 existing functions redeveloped in new architecture

Modern Software Architecture
• Extensible
• Embeddable
• Scalable

Easily Customizable
Build menus easily by pointing and clicking, or use VBA to build applications. Create or extend your application using ArcObjects™, the only completely embeddable GIS toolkit.

Network Analysis
• Wizard-driven connectivity rules
• Shortest path
• Network/Loop modeling
• Find source path
• Find common tree
• Upstream/Downstream trace
• Isolation trace

Powerful Report Writing
Create a multimedia report quickly within one environment.

for MORE THAN 30 YEARS ESRI HAS SET THE STANDARD.
Now we have transformed it.
