Job Tracking for ArcGIS® (JTX™)

Enterprise GIS Workflow Management and Job Tracking

Efficiently allocate staffing resources and track the status and progress of work schedules.

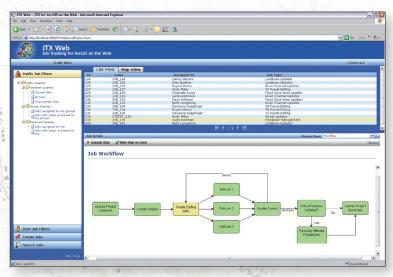

GIS Workflow Management

Better Manage Your GIS Tasks and Resources with One Tool

Organize, standardize, and streamline your personal, departmental, and organizational workflows with Job Tracking for ArcGIS® (JTX™). Available for the desktop and server, Job Tracking for ArcGIS (JTX) is enterprise workflow management software that simplifies many aspects of geographic information system (GIS) and non-GIS job management and tracking, saving you time and allowing you and your organization to more efficiently utilize resources.

With Job Tracking for ArcGIS (JTX) you can improve productivity and efficiency with tools that allow you to

- Allocate staffing resources and track job status and work schedules
- Distribute work geographically to help manage a dispersed workforce, a project team across organizations, or contractors around the world.
- Centralize all job-related information to maintain consistency across your organization or business unit.
- Reduce repetitive setup tasks and automate key processes.
- Simplify geodatabase version creation, management, and access for more efficient and accurate multiuser editing.
- Configure and customize Job Tracking for ArcGIS (JTX) to fit your unique business needs.
- Access the capabilities of Job Tracking for ArcGIS (JTX) through an easy-to-use Web application on the desktop or in the field (server only).

Access information about your jobs through an easy-to-use Web application on the desktop or in the field.
